Hospital Architecture and Beyond Isadore Rosenfield, Zachary Rosenfield, 1969 Provides a fundamental and rational approach to hospital planning **Architecture and the Modern Hospital** Julie Willis, Philip Goad, Cameron Logan, 2018-10-09 More than any other building type in the twentieth century the hospital was connected to transformations in the health of populations and expectations of lifespan From the scale of public health to the level of the individual the architecture of the modern hospital has reshaped knowledge about health and disease and perceptions of bodily integrity and security However the rich and genuinely global architectural history of these hospitals is poorly understood and largely forgotten This book explores the rapid evolution of hospital design in the twentieth century analysing the ways in which architects and other specialists reimagined the modern hospital It examines how the vast expansion of medical institutions over the course of the century was enabled by new approaches to architectural design and it highlights the emerging political conviction that physical health would become the cornerstone of human welfare **African American Architects** Dreck Spurlock Wilson, 2004-03 Since 1865 African American architects have been designing and building houses and public buildings but the architects are virtually unknown This work brings their lives and work to light for the first time Hospital Architecture and Beyond [by] Isadore Rosenfield in Collaboration with Zachary Rosenfield Isadore Rosenfield, 1969

Medicine Moves to the Mall David Charles Sloane, Beverlie Conant Sloane, 2003-04-01 The shopping mall seems an unlikely place to go for health care services Yet the mall has become home to such services as well as a model for redesigning other health care facilities In *Medicine Moves to the Mall* David Charles Sloane and Beverlie Conant Sloane document the historical changes to our health care landscape by exploring the interactions between medicine and place This unique combination of architectural history and the history of medicine provides a thought provoking analysis of the geography of the practice of medicine The book presents three essays each accompanied by a gallery of historical and recent photos The authors discuss the rise of modern hospitals and how they were shaped into scientifically sterile and humanly stark medical workshops Starting in the 1970s hospital facilities were altered in appearance to become more friendly and welcoming The integration of a shopping mall's spaciousness and open design with technology and scientific innovation served in humanizing the hospital Most recently the accessibility and convenience of shopping center and roadside clinics have invited Americans to go shopping for health in the increasingly commercialized medical system *Medicine Moves to the Mall* will appeal to scholars and professionals in fields ranging from health care to cultural geography and from urban studies to architectural history as well as to readers interested in the shifting status of medicine in American society

Turner, 1954 **Architecture and Ritual** Peter Blundell Jones, 2016-08-25 Architecture and Ritual explores how the varied rituals of everyday life are framed and defined in space by the buildings which we inhabit It penetrates beyond traditional assumptions about architectural style aesthetics and utility to deal with something more implicit how buildings shape and reflect our experience in ways of which we remain unconscious Whether designed to house a grand ceremony or provide shelter for a daily meal all buildings coordinate and consolidate social relations by giving orientation and focus to the spatial practices of those who use them Peter Blundell Jones investigates these connections between the social and the spatial providing critical insights into the capacity for

architecture to structure human ritual from the grand and formal to the mundane This is achieved through deep readings of individual pieces of architecture each with a detailed description of its particular social setting and use The case studies are drawn from throughout architectural history and from around the globe each enabling a distinct theoretical theme to emerge and showing how social conventions vary with time and place as well as what they have in common Case studies range from the Nuremberg Rally to the Centre Pompidou and from the Palace of Westminster to Dogon dwellings in Africa and a Modernist hospital In considering how all architecture has to mesh with the habits beliefs rituals and expectations of the society that created it the book presents deep implications for our understanding of architectural history and theory It also highlights the importance for architects of understanding how buildings frame social space before they prescribe new architectural designs of their own The book ends with a recent example of user participation showing how contemporary user interest and commitment to a building can be as strong as ever Current Catalog National Library of Medicine (U.S.),1969 Includes subject section name section and 1968 1970 technical reports
