dreamed of preventing catastrophic outbreaks of infectious disease Yet despite a century of medical progress viral and bacterial disasters continue to take us by surprise inciting panic and dominating news cycles From the Spanish flu and the 1924 outbreak of pneumonic plague in Los Angeles to the 1930 parrot fever pandemic and the more recent SARS Ebola and Zika epidemics the last 100 years have been marked by a succession of unanticipated pandemic alarms Like man eating sharks predatory pathogens are always present in nature waiting to strike when one is seemingly vanquished others appear in its place These pandemics remind us of the limits of scientific knowledge as well as the role that human behaviour and technologies play in the emergence and spread of microbial diseases

*Into the Headwinds* Terryl Givens, Nathaniel Givens, 2022-10-18 A deeper look at how people individually and collectively form religious beliefs and what that means for faith in an increasingly secular culture Secularism is increasingly a fact of life in Western society But that doesn't necessarily mean that faith is harder than it has been before Even in the past when organized religion enjoyed more widespread cultural acceptance there were still obstacles to true belief Today the obstacles are different but faith is still viable Acclaimed author Terryl Givens and his son Nathaniel Givens combine their respective areas of expertise to offer a fresh take on religious belief through the lens of contemporary research on psychology cognition and human nature They also address two of faith's foremost modern day antagonists rationalism the myth that humans can or should make the majority of their choices based on logical thought and scientism the myth that science is the only reliable means of discovering truth After reckoning with the surprising fact that people often don't even understand their own beliefs and are influenced in ways they seldom perceive the authors go on to describe genuine faith as an act of will an effortful response to the deepest yearnings of the mind and heart that engenders moral responsibility the ability to embrace uncertainty the motivation and means to relate to others and the capacity to apprehend reality through nonrational means Written for truth seekers who may or may not belong to religious communities *Into the Headwinds* is less a work of apologetics than an inquiry into the role that faith can and does still play in a society where participation in institutional religion is declining precipitously Terryl and Nathaniel Givens propose that to reclaim the power of genuine faith we need to first acknowledge the reality that religious belief is hard It always has been and it always
