**Introducing Sociology Using the Stuff of Everyday Life** Josee Johnston, Kate Cairns, Shyon Baumann, 2017-01-06 The challenges of teaching a successful introductory sociology course today demand materials from a publisher very different from the norm. Texts that are organized the way the discipline structures itself intellectually no longer connect with the majority of student learners. This is not an issue of pandering to students or otherwise seeking the lowest common denominator. On the contrary, it is a question of again making the practice of sociological thinking meaningful, rigorous and relevant to today's world of undergraduates. This comparatively concise, highly visual and affordable book offers a refreshingly new way forward to reach students using one of the most powerful tools in a sociologist's teaching arsenal: the familiar stuff in students' everyday lives throughout the world: the jeans they wear to class, the coffee they drink each morning or the phones their professors tell them to put away during lectures. A focus on consumer culture, seeing the strange in the familiar, is not only interesting for students; it is also what the authors suggest pedagogically superior to more traditional approaches. By engaging students through their stuff, this book moves beyond teaching about sociology to helping instructors teach the practice of sociological thinking. It moves beyond describing what sociology is so that students can practice what sociological thinking can do. This pedagogy also posits a relationship between teacher and learner that is bi-directional. Many students feel a sense of authority in various areas of consumer culture and they often enjoy sharing their knowledge with fellow students and with their instructor. Opening up the sociology classroom to discussion of these topics validates students' expertise on their own life worlds. Teachers in turn gain insight from the goods, services and cultural expectations that shape students' lives. While innovative, the book has been carefully crafted to make it as useful and flexible as possible for instructors aiming to build core sociological foundations in a single semester. A map on pages ii-iii identifies core sociological concepts covered so that a traditional syllabus as well as individual lectures can easily be maintained. Theory, method and active learning exercises in every chapter constantly encourage the sociological imagination as well as the doing of sociology.

**Wie unser Essen uns krank macht** Robert H. Lustig, 2021-12-12 In der Hektik des Alltags greifen wir nur allzu gern auf verarbeitete Lebensmittel zurück. Doch genau diese sind dafür verantwortlich, dass Diabetes und viele weitere chronische Erkrankungen sich so rasant verbreiten. Dr. Robert H. Lustig verändert die Sichtweise auf unsere Nahrung radikal. Er entlarvt die Lügen und Strategien der Lebensmittelindustrie und beschreibt, wie verarbeitete Lebensmittel uns süchtig machen. Der erfahrene Mediziner zeigt aber auch, wie man es trotzdem schafft, sich gesund zu ernähren, und welche chronischen Beschwerden man dadurch vermeiden oder sogar rückgängig machen kann. Ein Wegweiser zu einem gesünderen und glücklicheren Leben.

copies of this title and a lesson plan      Springboards to Inquiry Paige Jaeger, Mary Boyd Ratzer, 2019-07-23 This collection of ideas for lessons provides school librarians with inspiration for meeting the tsunami of new standards dictating change for today's next generation learners. Today's school librarian has less and less time to prepare for instruction. This book delivers lesson plans for the librarian to implement immediately as is or with a little adaptation. Using the new AASL standards and an Information Literacy scope and sequence carefully crafted for K-6 students, the authors package lessons that are both engaging and challenging. This book inspires librarians to go beyond their usual role in literacy promotion and instruction only and moves to preparing students to be inquiry learners by embracing inquiry-based learning. Lessons include the Essential Question, begin with the end in mind, pre and post assessment ideas, technology integration ideas where applicable, reading and research ideas, and collaboration ideas when applicable. AASL Standards and others are noted via an integrated standards checklist while new educational research demonstrates that standards can be met via engaging, collaborative, and interesting lessons modeled throughout the text.

**Food** John Coveney, 2013-07-18 The centrality of food in life and the importance of food as life is undeniable. As a source of biological substrates, personal pleasure, and political power, food is and has been an enduring requirement of human biological, social, and cultural existence. In recent years, interest in food has increased across the academic, public, and popular spheres, fuelled by popular media's constant play on the role of food and body size and food and cooking as a mass spectacle for TV audiences. In *Food*, a new book part of the Shortcuts Series, John Coveney examines food as humanness, identity, politics, industry, regulation, the environment, and justice. He explores how food helps us understand what it means to be human. Through food, we construct our social identities, our families, and communities, but this book also highlights the tensions between the industrialisation of food, the environment, and the fair or otherwise worldwide distribution of food. It considers how the food industries on which most of us have to rely have also had direct effects on our bodies, whether through diet and longevity or the development of illness and diseases. This book is for all students and general readers alike or for anyone with a fascination with food. It questions the idea that food is merely something inert on the plate and instead shows how influential, symbolic, powerful, and transformative food has come to be. This book is part of the Shortcuts series published by Routledge, a major new series of concise, accessible introductions to some of the major issues of our times.

**Think Tank Library** Paige Jaeger, Mary Boyd Ratzer, 2014-12-04 Transform your library into a think tank by helping teachers create an active learning environment in which students question, investigate, synthesize, conclude, and present information based on Common Core standards. The rigors of today's mandated academic standards can repurpose your library's role as a steward of the Common Core State Standards (CCSS) at your school. This guide will help you help teachers present exciting, field-tested lessons for elementary grades K through 5, addressing developmental steps and individual differences in key competencies in the CCSS. Authors and educators Mary Ratzer and Paige Jaeger illustrate how brain-based learning helps students become deep critical thinkers and provide the lesson plans to

coax the best thinking out of each child This tool book presents strategies to help learners progress from novice to expert thinker challenge younger students with questions that lead to inquiry incorporate rigor into lessons and use model lesson plans to change instruction Beginning chapters introduce the basics of instruction and provide ideas for expert cognitive growth of the brain Sample lessons are aligned with key curriculum areas including science social studies music art and physical education
