I Have Life Alison, Marianne Thamm, 1998 Follows the story of Alison who survived a violent rape attack in Port Elizabeth

eIoT Steffi O. Muhanji, Alison E. Flint, Amro M. Farid, 2019-02-20 This open access book explores the collision between the sustainable energy transition and the Internet of Things IoT In that regard this book's arrival is timely Not only is the Internet of Things for energy applications herein called the energy Internet of Things eIoT rapidly developing but also the transition towards sustainable energy to abate global climate is very much at the forefront of public discourse It is within the context of these two dynamic thrusts digitization and global climate change that the energy industry sees itself undergoing significant change in how it is operated and managed This book recognizes that they impose five fundamental energy management change drivers 1 the growing demand for electricity 2 the emergence of renewable energy resources 3 the emergence of electrified transportation 4 the deregulation of electric power markets 5 and innovations in smart grid technology Together they challenge many of the assumptions upon which the electric grid was first built The goal of this book is to provide a single integrated picture of how eIoT can come to transform our energy infrastructure This book links the energy management change drivers mentioned above to the need for a technical energy management solution It then describes how eIoT meets many of the criteria required for such a technical solution In that regard the book stresses the ability of eIoT to add sensing decision making and actuation capabilities to millions or perhaps even billions of interacting smart devices With such a large scale transformation composed of so many independent actions the book also organizes the discussion into a single multi layer energy management control loop structure Consequently much attention is given to not just network enabled physical devices but also communication networks distributed control decision making and finally technical architectures and standards Having gone into the detail of these many simultaneously developing technologies the book returns to how these technologies when integrated form new applications for transactive energy In that regard it highlights several eIoT enabled energy management use cases that fundamentally change the relationship between end users utilities and grid operators Consequently the book discusses some of the emerging applications for utilities industry commerce and residences The book concludes that these eIoT applications will transform today's grid into one that is much more responsive dynamic adaptive and flexible It also concludes that this transformation will bring about new challenges and opportunities for the cyber physical economic performance of the grid and the business models of its increasingly growing number of participants and stakeholders

Babel Unbound Lesley Cowling, Carolyn Hamilton, 2020-05-01 In this timely original and sophisticated collection writers from the Global South demonstrate that forms of publicness are multiple mobile and varied The notion that societies mediate issues through certain kinds of engagement is at the heart of imaginings of democracy and often centers on the ideal of the public sphere But this imagined foundation of how we live collectively appears to have suffered a dramatic collapse across the world with many democracies apparently unable to solve problems

through talk or even to agree on who speaks in what ways and where In the 10 essays in this timely original and sophisticated collection writers from southern Africa combine theoretical analysis with the examination of historical cases and contemporary developments to demonstrate that forms of publicness are multiple mobile and varied They propose new concepts and methodologies to analyse how public engagements work in society Babel Unbound examines charged examples from the Global South such as the centuries old Timbuktu archive Nelson Mandela as a powerful absent presence in 1960s public life and the challenges to the terms of contemporary debate around the student activism of rhodesmustfall and feesmustfall These show how issues of public discussion span both archive and media verbal debates in formal spaces and visual performances that circulate in unpredictable ways
