## 6 Degrees of protection against ingress of water indicated by the second characteristic numeral

The second characteristic numeral indicates the degree of protection provided by enclosures with respect to harmful effects on the equipment due to the ingress of water.

The tests for the second characteristic numeral are carried out with fresh water. The actual protection may not be satisfactory if cleaning operations with high pressure **and temperature water jet outside the requirements of second characteristic numeral 9** and/or solvents are used.

Table 3 gives brief descriptions and definitions of the protection for the degrees represented by the second characteristic numeral.

Degrees of protection listed in this table shall be specified only by the second characteristic numeral and not by reference to the brief description or definition.

The tests are specified in clause 14.

Up to and including second characteristic numeral 6, the designation implies compliance also with the requirements for all lower characteristic numerals. However, the tests establishing compliance with any one of the lower degrees of protection need not necessarily be carried out provided that these tests obviously would be met if applied.

An enclosure designated with second characteristic numeral ~~2 or 3~~ **9** only is considered unsuitable for exposure to water jets (designated by second characteristic numeral 5 or 6) **and immersion in water (designated by second characteristic numeral 7 or 8)** and need not comply with requirements for numeral ~~5 or 6~~ **7 or 8** unless it is ~~dual multiple~~ coded as follows:
