Lignocellulosic Biorefining Technologies Avinash P. Ingle,Anuj Kumar Chandel,Silvio Silverio da Silva,2020-04-13 A text to the advances and development of novel technologies in the production of high value products from economically viable raw materials Lignocellulosic Biorefining Technologies is an essential guide to the most recent advances and developments of novel technologies in the production of various high value products from economically viable raw materials Written by a team of experts on the topic the book covers important topics specifically on production of economical and sustainable products such as various biofuels organic acids enzymes biopigments

biosurfactants etc The book highlights the important aspects of lignocellulosic biorefining including structure function and chemical composition of the plant cell wall and reviews the details about the various components present in the lignocellulosic biomass and their characterizations The authors explore the various approaches available for processing lignocellulosic biomass into second generation sugars and focus on the possibilities of utilization of lignocellulosic feedstocks for the production of biofuels and biochemicals Each chapter includes a range of clear informative tables and figures and contains relevant references of published articles This important text Provides cutting edge information on the recent developments in lignocellulose biorefinery Reviews production of various economically important and sustainable products such as biofuels organic acids biopigments and biosurfactants Highlights several broad ranging areas of recent advances in the utilization of a variety of lignocellulosic feedstocks Provides a valuable authoritative reference for anyone interested in the topic Written for post graduate students and researchers in disciplines such as biotechnology bioengineering forestry agriculture and chemical industry Lignocellulosic Biorefining Technologies is an authoritative and updated guide to the knowledge about various biorefining technologies

Green Extraction and Valorization of By-Products from Food Processing Francisco J. Barba, Elena Rosello Soto, Mladen Brncic, Jose Manuel Lorenzo Rodriguez, 2019-09-09 Generating of agricultural wastes and by products during the production processing and consumption of agricultural commodities is unavoidable and over the last decades an increased public interest has been shown in the challenge of food wastage Apart from its significant quantities the physicochemical characteristics of the various agricultural waste and by products denote that there is immense potential for their reuse recycle and valorisation through various different processes Green Extraction and Valorization of By Products from Food Processing provides an overview about the valorization or reuse of agricultural wastes and by products during the production processing and consumption of agricultural commodities Waste disposal and by product management in food processing industry pose problems in the areas of environmental protection and sustainability However they could be a great source of valuable nutraceuticals which can be used to deal with the prospects of feeding fast growing population in 21st century Features Gives detailed guidance and presents case studies about valorization of food wastes and by products Shows the main conventional and innovative extraction techniques for food waste and by products valorization Provides an estimated idea regarding the recovery of high added value compounds Discusses the recovery of high added value compounds Perspectives originated from the enormous amounts of food related materials that are discharged worldwide and the existing technologies which promise the recovery recycling and sustainability of high added value ingredients inside food chain will be discussed in this book This book is of value to academics research institutes and food industry engineers particularly the research and development professionals who are looking for effective management and utilization of food processing wastes and byproducts In addition it is suitable for undergraduate post graduate students research scholars postdoctoral fellows and faculty members from universities and colleges who pursue
