Winningham's Critical Thinking Cases in Nursing - E-Book Mariann M. Harding, Julie S. Snyder, Barbara A.

Preusser, 2013-12-27 Develop your critical thinking and clinical reasoning skills with 150 realistic case studies from the four major clinical practice areas: medical surgical, pediatric, maternity, and psychiatric/mental health nursing. Each case covers a common problem drawn from actual clinical experiences and written by nurses who are clinical experts. All cases have been thoroughly updated and revised to reflect current clinical practices with integrated content on pharmacology, nutrition, and diagnostic laboratory tests to encourage you to think critically about all aspects of care. This fifth edition also features an increased emphasis on patient management and new documentation and communication exercises. Plus new NCLEX Examination format questions help you prepare for success on the NCLEX Examination and provide safe quality patient care. Three part organization presents cases in three parts: 1 Medical Surgical Cases, 2 Pediatric, Maternity, and Psychiatric Cases, and 3 Other Advanced Cases, the latter covering key topics such as multi-system disorders and emergency situations. Realistic case study approach incorporates cases drawn from actual clinical experiences to help you identify changes, anticipate possible complications, and initiate therapeutic interventions. Increasing case complexity provides you with a foundation on which to build as you advance to more difficult cases. Two new pediatric case studies strengthen your ability to recognize and effectively manage common disorders presenting in pediatric patients. New NCLEX Examination format questions have been added throughout, including multiple choice, prioritization, ordering, chart exhibit, and dosage calculation questions. Increased number of higher level questions requires clinical reasoning rather than simply memorizing and recalling information. An emphasis on patient management reinforces the type of clinical decision making needed in the clinical setting, as well as reflecting the type of questions on the latest NCLEX Examination. Over 25 new illustrations and graphics, such as ECG strips, lab diagnostic test reports, anatomical diagrams, and medication labels, are now interwoven throughout the book. New documentation and communication exercises ask you to document relevant patient information or to use the SBAR communication technique to communicate patient findings to the physician. Psychiatric-Mental Health Nursing Jeffrey S. Jones, Joyce J. Fitzpatrick, Vickie L. Rogers, 2016-03-22 Thoroughly updated to correlate with DSM 5 diagnostic descriptions and QSEN guidelines, the second edition of this highly acclaimed undergraduate psychiatric nursing text features concrete strategies for establishing interpersonal relationships as the basis not only for working with the psychiatric patient population but as a timeless foundation for all nursing practice. The text guides students through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice. Modules designed to foster growth in therapeutic use of self, including the importance of boundary management, are integrated with psychodynamic and current neurobiological theories to provide sturdy theoretical underpinnings for practice. A wealth of descriptive psychiatric diagnoses of DSM 5, QSEN criteria, and NANDA based care plans, case scenarios, evidence based practice, patient and family

education tips drug summary lists and complementary and alternative therapy approaches populate the text The main body of the book focuses on common mental illnesses and weaves both the psychodynamic and neurobiological concepts into evidence based strategies for nursing interventions Additional features such as examples of therapeutic dialogue and a Consumer Perspective featuring an actual consumer voice relating personal experience about living with a specific illness provide further guidance in understanding and adopting a relationship based approach to nursing Web links facilitate quick access to additional information and NCLEX style review questions prepare students for passing the NCLEX exam New to the Second Edition Revisions correlate to DSM 5 descriptions QSEN criteria and NANDA nursing diagnoses Provides new information on psychopharmacology compassion fatigue and a recovery model use of informed consent and cognitive behavioral therapy Presents updates on complementary and alternative interventions Includes expanded content on cultural and life span considerations related to mental health care worldwide Key Features Focuses on interpersonal relationships and boundary navigation as the foundation for practice Promotes psychodynamic and neurobiological perspectives within ISPN curricular guidelines Written by national and international experts in nursing education and psychiatric mental health practice Includes a digital student companion with key chapter concepts and critical thinking questions for practice situations Provides digital faculty resources including PowerPoint slides an expanded test bank case studies and critical thinking exercises
