**Civil Society Regionalization in Southern Africa** Andréas Godsäter, 2016-05-12 This book investigates civil society regionalization in Southern Africa The point of departure is the study of new regionalism which refers to the wave of regional integration globally since the 1980s However whilst the current regionalism studies undoubtedly contributes to a deeper understanding of regional processes important

gaps remain in particular the relatively scant emphasis given to civil society This particularly relates to regions in the global South including Southern Africa The overarching aim of this book is therefore to analyse the dynamics of civil society regionalization in Southern Africa both empirically and from a theoretical perspective through analysing the cases of trade and HIV AIDS The study finds that CSOs can be more active in regional governance than has previously been conceptualized and are also highly active in terms of constructing regionalization through framing issues and to a less extent making identities regional Furthermore the book enhances knowledge of the heterogeneous nature of civil society regionalization Lastly it is demonstrated that going regional is only partly an autonomous process and also has to be understood as under the influence of the deeper statist and capitalist social structures marking the regional order in Southern Africa

**Reimagining Mental Health and Addiction Under the Covid-19 Pandemic, Volume 2** Dionisio Nyaga,Rose Ann Torres,2024-07-02 This edited collection is a follow up to Algoma University s inaugural conference on mental health and addiction held at the Brampton campus in Ontario Canada We live in a society where many marginalized communities continue to bear a historically disproportionate burden on their psychological mental and economic well being especially under the Covid 19 pandemic Covid 19 has had a continuing impact on marginalized and racialized communities at all levels We are now witnessing the compounded effects in

the form of a worsening mental health and addiction crisis and its subsequent impact on children's education service delivery and overall psychosocial well-being. Covid 19 has widened the gap and increased poverty disparities between high income and low income individuals. Furthermore, it has affected the psychosocial resilience of people. As communities of scholars, practitioners, and researchers, we have a responsibility to address these existential issues in ways that are ethical and transformative. This type of engagement should help mitigate the consequences of the pandemic in an intersectional manner. These conversations should assist us in understanding and addressing the trauma and suffering that marginalized communities and individuals continue to endure. Together, we can work to find answers to mental health and addiction challenges while valuing people's histories and realities within this intersectional engagement. This book aims to redefine psychiatric discourse in the age of the pandemic and encourage us to imagine how the world can be reformed in ways that are both ethical and political. It has the potential to shed light on the values and realities of communities in discussions of medical sociology, particularly concerning the impact of Covid 19 on marginalized communities. This book is structured into three volumes. Volume one delves into the repercussions of the COVID 19 pandemic on the mental health of various ethnic groups. Volume two specifically addresses the impact of the pandemic on the mental health of Afro-Black individuals. Volume three explores the connections between the COVID 19 pandemic, psychological well-being, and colonialism.
