Our updated lodging outlook

Highlights

Lodging's recovery continues, with strong demand growth and rising room rates. Construction activity remains below historical averages, but is picking up.

Our outlook for 2014 anticipates:

- RevPAR growth of 6.0%, primarily driven by stronger ADR.
- Demand growth of 2.4%.
- Increased hotel construction starts, but supply growth of 1.0%, still well below the long-term average of 1.5%.
- Accelerating gains in hotel pricing, with ADR rising 4.3% compared to 3.9% in 2013.
- Strongest performance gains in the higher-priced chain-scale segments, particularly luxury.

Our outlook assumes stronger economic growth, as fiscal headwinds ease and the underlying momentum of the recovery shows through. We assume GDP growth of 2.1% in 2014 (Q4/Q4 basis).

Room rate gains accelerate, aided by strong occupancy and below average supply growth

Continued recovery in lodging demand and gathering economic momentum supports our expectations for hotel performance in 2014. The lodging cycle is in a favorable stage, with above average occupancy levels and demand growth that continues to outpace hotel openings. Stronger gains in ADR are expected as revenue management tactics gain traction, and we expect RevPAR growth to accelerate to 6.0% in 2014. As a milestone in the recovery, by the fourth quarter of 2014 we expect real, seasonally adjusted RevPAR will recover to the peak reached in the fourth quarter of 2007 at the onset of the economic recession.

Our updated lodging outlook incorporates recent hotel performance—strong demand growth in the fourth quarter, albeit with somewhat slower ADR gains—and a macroeconomic context that is more clear. Hotel construction activity is rebounding from a low base. Our outlook for supply continues to anticipate 1.0% growth, but with fourth quarter room starts up solidly (44.1% ahead of prior year), the pipeline for 2015 openings is expanding. In the current economic cycle, hotels in the luxury, upper upscale and upscale chain scales have recovered occupancy levels more quickly and are now experiencing greater gains in ADR. In particular, luxury hotels are on track to reach 75.6% occupancy in 2014, and upper upscale hotels are anticipated to benefit from a gradual recovery in group activity and reach 72.7%.

Economic momentum gains, boosting expectations for travel

Underlying the effects of fiscal drag, the economy showed greater than anticipated momentum last year. Macroeconomic Advisers now anticipates GDP grew above-trend during 2013 (2.6%), and expects growth to improve to 3.1% in 2014. In the leisure segment, travel growth is expected to be supported by recent gains in household wealth (up \$9.7 trillion in 2013, or 13.7%), reduced household deleveraging, and waning effects of the adjustment to higher income taxes. In the business segment, the lingering uncertainty that restrained business investment spending is ebbing and confidence is building. Downside risks have eased some with the signing of the two-year Federal budget, better prospects for Eurozone recovery, less concern of a hard-landing in China, and lower risk of a wider conflict in the Middle East.

International Hospitality Management Marco A. Gardini, Michael C. Ottenbacher, Markus Schuckert, 2020-11-09. The hospitality sector is facing increasing competition and complexity over recent decades in its development towards a global industry. The strategic response to this is still that hospitality companies try to grow outside their traditional territories and domestic markets while the expansion patterns and M & A activities of international hotel and restaurant chains reflect this phenomenon. Yet interestingly the strategies, concepts and methods of internationalization as well as the managerial and organizational challenges and impacts of globalizing the hospitality business are under researched in this industry. While the mainstream research on international management offers an abundance of information and knowledge on topics, players, trends, concepts, frameworks or methodologies, its ability to produce viable insights for the hospitality industry is limited as the mainstream research is taking place outside of the service sector. Specific research directions and related cases like the international dimensions of strategy, organization, marketing, sales, staffing, control, culture and others to the hospitality industry are rarely identifiable so far. The core rationale of this book is therefore to present newest insights from research and industry in the field of international hospitality, drawing together recent scientific knowledge and state of the art expertise to suggest directions for future work. It is designed to raise awareness on the international factors influencing the strategy and performance of hospitality organizations while analyzing and discussing the present and future challenges for hospitality firms going or being international. This book will provide a comprehensive overview and deeper understanding of trends and issues to researchers, practitioners and students by showing how to master current and future challenges when entering and competing in the global hospitality industry. This book examines the evolving economic relationship between China and the West in particular investment regimes and climates. How do their economic models differ, how do they interact and what does it mean for growth and economic freedom? In recent years the amount of Chinese FDI in Europe and the US has soared. Although European and American FDI in China is still significantly higher, the discussion about fair regulations for investors in both countries is subject of expanding debate. All this takes place in the middle of the negotiation of a new investment treaty with the European Union and prospects of a trade war between
