Computational Developmental Psychology Thomas R. Shultz, 2003 An overview of the emerging discipline of computational developmental psychology emphasizing the use of constructivist neural networks Despite decades of scientific research the core issues of child development remain too complex to be explained by traditional verbal theories These issues include structure and transition representation and processing innate and experiential determinants of development stages of development the purpose and end of development and the relation between knowledge and learning In this book Thomas Shultz shows how computational modeling can be used to capture these complex phenomena and in so doing he lays the foundation for a new subfield of developmental psychology computational developmental psychology A principal approach in developmental thinking is the constructivist one Constructivism is the Piagetian view that the child builds new cognitive structures by using current mental structures to understand new events In this book Shultz features constructivist models employing networks that grow as well as learn This allows models to implement synaptogenesis and neurogenesis in a way that allows qualitative changes in processing mechanisms The book's appendices provide additional background on the mathematical concepts used and a companion Web site contains easy to use computational packages

The Development of Children and Adolescents Penny Hauser-Cram, J. Kevin Nugent, Kathleen Thies, John F. Travers, 2013-11-25 The Development of Children and Adolescents by Penny Hauser Cram J Kevin Nugent Kathleen Thies and John F Travers provides an integrated view of child development Presenting the most pertinent research for each developmental stage and linking this to practical applications in the areas of Parenting Policy and Practice this balanced approach emphasizes the relationship between research and theory and applications The rich media program including WileyPLUS with Real Development promotes active learning and allows for increased understanding and comprehension of the course content Real Development authored by Nicole Barnes Ph D Montclair State University and Christine Hatchard Psy D Monmouth University uses authentic video showcasing real families along with activities and assessments that put students in the place of a professional to gain an understanding of key concepts Through the combination of text and media students are engaged in meaningful learning that deepens and enriches their understanding of developmental concepts WileyPLUS sold separately from text

The Social Context of Cognitive Development Mary Gauvain, 2001-01-01 Traditional approaches to cognitive development can tell us a great deal about the internal processes involved in learning Sociocultural perspectives on the other hand provide valuable insights into the influences on learning of relationship and cultural variables This volume provides a much needed bridge between these disparate bodies of research examining the specific processes through which children internalize the lessons learned in social contexts The book reviews current findings on four specific domains of cognitive development attention memory problem solving and planning The course of intellectual growth in each domain is described and social factors that support or constrain it are identified The focus throughout is on how family peer and

community factors influence not only what a child learns but also how learning occurs Supporting her arguments with solid empirical data the author convincingly shows how attention to sociocultural factors can productively complement more traditional avenues of investigation
