environments describing the processes and products of student learning rather than enumerating deficits situating pedagogy and evaluation within systems that incorporate rather than exclude local variables and distributing assessment among diverse audiences By advocating for a flexible system of communication based assessment in computer mediated writing instruction this book validates teachers and students experiences with writing and also acknowledges the real world weight of the new writing components on the SAT and ACT as well as on state mandated standardized writing and proficiency exams

decade for universities The marketization of higher education the adjunctification of labor and culture wars over curriculum transformed the landscape in a short period of time The Battles of Texas traces the lived consequences of this upheaval by focusing on one influential institution the writing program at the University of Texas at Austin Drawing from university records newspaper archives and present day interviews Nate Kreuter and Mark Garrett Longaker provide an on the ground perspective of the radical creation of UT Austin s writing program and the subsequent events that made national headlines the mass firing of lecturers in 1985 the national debate over multicultural content in the first year curriculum and the divorce

of the writing program from the English Department in 1992 Despite these pressures however the authors also reveal how writing program administrators at UT Austin exerted their own agency to resist economic and political forces in service of their students and adjunct lecturers By highlighting the parallels between the 1980s and current labor and political pressures in higher education The Battles of Texas offers a strategic perspective for academics and administrators today Combining a narrative institutional history with a public digital archive searchable and arranged in exhibits and in chronological annals The Battles of Texas provides academics with the resources they need to survive in times of rapid transition

Writing for Life Sammy R Browne, Metadiscourse in L1 and L2 English Annelie Ädel, 2006-01-01 The pervasive phenomenon of metadiscourse commentary on the ongoing discourse is beginning to take its rightful place among the major topics of discourse studies This book makes simultaneous contributions to the theory of metadiscourse corpus based methods of studying such phenomena and our knowledge of metadiscourse use in written English After comprehensively reviewing previous research it introduces a more rigorous and empirical approach to metadiscourse studies del presents a new model of metadiscourse based on Jakobson s functions of language and other conceptual tools including explicit features for defining metadiscourse a taxonomy of the functions it serves and maps of the boundaries between it and related phenomena A large scale study of writing by L1 and L2 university students is presented in which the L2 speakers overuse of metadiscourse strongly marks them as lacking in communicative competence This work is of interest both to linguists and to educators concerned with writing in English
