we are Robert V Kail's expertise in childhood and adolescence combined with John C Cavanaugh's extensive research in gerontology result in a book with a rich description of all life span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course.

Sri Aurobindo's Vision of Integral Human Development Monica Gupta, 2014-05-22 This book explores the integral vision of human development contained in the original works of Sri Aurobindo and The Mother. It delves into multiple layers of the human personality as envisaged by Sri Aurobindo and The Mother and explores a new developmental science of consciousness based on the practice of Integral Yoga. The book examines the major metatheoretical conceptions that shape the contemporary discipline of developmental psychology and discusses the ways in which Sri Aurobindo's philosophical and psychological perspective can help break fresh ground for developmental theorisation and research by extending the current understanding of the human evolutionary potential. The author proposes a new agenda for human development which brings together the key ideas of integral individual and collective development and informs practices in the areas of counselling, education, parenting and self-development. This book will be of special interest for researchers of developmental psychology, human development, counselling psychology, philosophy, social work and education.

Functional Movement Development Across the Life Span - E-Book Donna Joy Cech, Suzanne Tink Martin, 2023-11-20 Providing a solid foundation in the normal development of functional movement, *Functional Movement Development Across the Life Span* 4th Edition helps you recognize and understand typical functional movement in individuals from infancy to older adulthood, providing a framework from which to identify movement disorders and effectively manage patients with abnormal motor function. Divided into three units, this edition describes 1) theoretical frameworks of development: motor control, motor learning and health/wellness; 2) anatomical and physiological development of the body systems comprising the movement system: muscular, skeletal, cardiopulmonary, nervous, sensory, integumentary and endocrine; and 3) life span description of the movement functions of posture, balance, locomotion, prehension and fitness. This edition integrates themes of the movement system, life span development and health/wellness, providing you with the most current information needed for clinical decision making and to be an effective practitioner. Written by physical therapy experts Donna J Cech, Suzanne Tink Martin and William Staples, this book provides the evidence-based information and tools needed to understand functional movement and manage patients' functional skills throughout the life span. Dr Staples brings his expertise in geriatric physical therapy and exercise in aging, enriching content on aging throughout the book. More than 200 illustrations, tables and special features clarify developmental concepts, address clinical implications and summarize key points relating to clinical practice.
