Sound, Society and the Geography of Popular Music Thomas L. Bell, 2016-04-01 Popular music is a cultural form much rooted in space and place This book interprets the meaning of music from a spatial perspective and in doing so it furthers our understanding of broader social relations and trends including identity attachment to place cultural economies social activism and politics The book's editors have brought together a team of scholars to discuss the latest innovative thinking on music and its geographies illustrated with a fascinating range of case studies from the USA Canada the Caribbean Australia and Great Britain

Migration Michael Samers, Michael Collyer, 2016-12-08 While the subject of migration has received enormous attention in academic journals and books across the social sciences introductory texts on the matter are few and far between Even fewer books have explored migration through a critical and explicit engagement with spatial concepts Now in its second edition Migration remains the only text in more than a decade that emphasizes how geographical or spatial concepts can be used critically to understand migration The multi disciplinary text draws on insights from human geography political science social anthropology sociology and to a lesser extent economics All of the chapters focus on key terms theories concepts and issues concerning migration and immigration The book argues that in the context of migration two opposing spatial positions have emerged in the wake of

the critique of methodological nationalism On one hand is the significance of transnationalism and on the other the importance of sub national or local processes Both require more nuance and integration while many of the concepts and theories which have thus far neglected space or have not been treated spatially need to be re written with space in mind Pedagogically the text combines a carefully defined structure accessible language boxes that explore case studies of migrant related experiences in particular places annotated suggestions for further reading useful websites and relevant films and summary questions for student learning at the end of each chapter Migration provides a critical multi disciplinary advanced and theoretically informed introduction to migration and immigration Revised and updated with new material new maps and illustrations and an accompanying website <https://migration2ndedition.wordpress.com> it continues to be aimed at advanced undergraduates and Masters level graduate students undertaking courses on migration and immigration

Sound, Society and the Geography of Popular Music Dr Ola Johansson, Professor Thomas L Bell, 2012-11-28 Popular music is a cultural form much rooted in space and place This book interprets the meaning of music from a spatial perspective and in doing so it furthers our understanding of broader social relations and trends including identity attachment to place cultural economies social activism and politics The book's editors have brought together a team of scholars to discuss the latest innovative thinking on music and its geographies illustrated with a fascinating range of case studies from the USA Canada the Caribbean Australia and Great Britain

Theories of Resistance Marcelo Lopes de Souza, Richard J. White, Simon Springer, 2016-06-17 Space is never a neutral stage on which social actors play their roles sometimes cooperating with each other sometimes struggling against each other Space has multiple and complex functions in the development of social relations it is a reference for identity building a material condition for existence and an instrument of power This book explores the ways in which space has been used for resistance especially in left libertarian contexts From the early anarchist organizing efforts in the 19th century to the contemporary social movements of the Mexican Zapatistas the chapters examine a range of cases to illustrate both the limits and potentialities of utilizing space within anarchist practice By theorizing the production of anarchist spaces the book aims to foster new geographical imaginations that energetically cultivate alternative practices to challenge the status quo It shows that spatial re organization spatial practices and spatial resources are also a basic condition for human emancipation autonomy and freedom

Senses of Place: Senses of Time G.J. Ashworth, 2017-03-02 Bringing together case studies from Ireland the Netherlands Canada Germany and Mexico this book examines the link between senses of place and senses of time It suggests that not only do place identities change through time but imagined pasts also provide

resources which the present selects and packages for its own contemporary purposes and for forwarding to imagined futures. The reasons behind the creation of place image are also explored setting them within political and social contexts. In its three main sections: Heritage in the Creation of Senses of Place, Heritage and Conflicting Identities, and Heritage and the Creation of Senses of Place, the book examines the creation of place identities at the urban, rural, regional, and international scales. It questions how senses of place interact with senses of ethnic cultural identity, what the roles of government, media, residents, and tourists are in creating senses of place, and how and why all these variables change through time.

The Routledge Handbook on Historic Urban Landscapes in the Asia-Pacific Kapila Silva, 2019-12-23. The Routledge Handbook on Historic Urban Landscapes in the Asia Pacific sheds light onto the balancing act of urban heritage management focusing specifically on the Asia Pacific regions in which this challenge is imminent and in need of effective solutions. Urban heritage, while being threatened amid myriad forces of global and ecological change, provides a vital social, cultural, and economic asset for regeneration and sustenance of liveability of inhabited urban areas worldwide. This six-part volume takes a critical look at the concept of Historic Urban Landscapes, the approach that UNESCO promotes to achieve holistic management of urban heritage through the lens of issues, prospects, and experiences of urban regeneration of the selected geo-cultural context. It further discusses the difficult task that heritage managers encounter in conceptualizing, mapping, curating, and sustaining the plurality, poetics, and politics of urban heritage of the regions in question. The connective thesis that weaves the chapters in this volume together reinforces for readers that the management of urban heritage considers cities as dynamic entities, palimpsests of historical memories, collages of social diversity, territories of contested identities, and sites for sustainable liveability. Throughout this edited collection, chapters argue for recognizing the totality of the eco-cultural urban fabric, embracing change, building social cohesion, and initiating strategic socio-economic progress in the conservation of Historic Urban Landscapes. Containing thirty-seven contributions written by leading regional experts and illustrated with over 200 black and white images and tables, this volume provides a much-needed resource on Historic Urban Landscapes for students, scholars, and researchers.
