Olaniyan,2018-04-18 This volume reports on the state of crisis in Africa in the early twenty first century Africa on the eve of the independence revolution was the continent of hope and high expectations By the third decade of independence optimism had been replaced by dismality African states had been beset by ethno political squabbles military rule civil wars Islamic and insurgent movements extreme poverty and disease With the ascent of redemocratization in the 1990s and of new pan Africanism derived from the formation of the African Union Africa appeared set to claim its vaunted destiny This book asks with hindsight to the first decade of the twenty first century how real was the renaissance in African life If the dismal African condition is a phase in the historical development of Africa this volume does not see any golden age in the past to which Africa aspires to return There is clearly a continuation and persistence of crisis with an absence of good governance personalisation of state power widespread disease and policy failure in education economy and infrastructural development Although endowed with abundant human and natural resources Africa remains the least developed and most indebted continent Whither then the African Renaissance The methodologies that underpin the contributions in this book are as diverse as the specialisations of the contributors The collection questions ideologically protected assumptions and presumptions presenting Africa as it is because it is only by knowing where Africa truly stands that a proper direction can be charted for it Human Geography H.
