Travels into Print Innes M. Keighren, Charles W. J. Withers, Bill Bell, 2015-05-11 In eighteenth and nineteenth century Britain books of travel and exploration were much more than simply the printed experiences of intrepid authors. They were works of both artistry and industry, products of the complex and often contested relationships between authors and editors, publishers and printers. These books captivated the reading public and played a vital role in creating new geographical truths. In an age of global wonder and of expanding empires, there was no publisher more renowned for its travel books than the House of John Murray. Drawing on detailed examination of the John Murray Archive of manuscripts, images and the firm's correspondence with its many authors, a list that included such illustrious explorers and scientists as Charles Darwin and Charles Lyell, and literary giants like Jane Austen, Lord Byron and Sir Walter Scott, *Travels into Print* considers how journeys of exploration became published accounts and how travelers sought to demonstrate the faithfulness of their written testimony and to secure their personal credibility. This fascinating study in historical geography and book history takes modern readers on a journey into the nature of exploration, the production of authority in published travel narratives and the creation of geographical authorship, a journey bound together by the unifying force of a world-leading publisher.

Governmentality William Walters, 2012 This text is an accessible but challenging introduction to the debate on governmentality and the continued relevance of this body of work for the study of global politics **Key Thinkers on Space and Place** Mary Gilmartin, Phil Hubbard, Rob Kitchin, Sue Roberts, 2024-05-11 Space and place are at the heart of how geographers and sociologists think. This updated edition of the essential undergraduate text will introduce you to the most influential thinkers in the tradition of social theory with a new focus on the past fifty years. This book is designed to engage with theoretical debates in human geography through the individuals who have made the most significant contributions to this field. This will show you how ideas are shaped by contexts and how those ideas in turn effect change. This book shows how theoretical understandings evolve, shift and change. It also highlights the connections between different thinkers whose ideas are developed in collaboration with or in reaction to others. Spatial thought is never developed in a vacuum but is always constructed by individuals and groups of people located in particular institutional and social structures with their own sets of personal and political beliefs. The biographical approach of this book reveals how individual thinkers draw on a rich legacy of ideas from past and contemporary generations. With increased coverage of international and female thinkers as well as those who work against Eurocentric notions of space and place, this book reveals the exciting reorientation of Geography towards new ideas and methods in the last decade. Each entry contextualises its subject within on-going interdisciplinary debates and important political moments as well as highlighting connections between different thinkers. Together the

chapters uncover the rich and diverse evolution of social theory equipping you with the foundational ideas of geographical thought Each entry offers the following components i a short biography ii an explanation of ideas iii an exploration of how their ideas have been used and critiqued iv a selective bibliography of key publications and key publications which review or critique
