1. Introduction

In the recent years, with the development of society, the high technology driven people's life and change the world. Ahuja 2011 explained that high technology innovation is one of the extremely important factors for the majority of the companies to acquire success in the competitive society. Even though high technology innovation changed the world and advanced the standard of human lifestyle, it is not enough for the development of society. The society needs a new innovation method to satisfied individuals' needs, design thinking is new approach to reach that and become more and more important for society (Brown, 2009). Thus, there are a large number of the design companies appeared to the global market, these firms are focus on design and develop products and make them to satisfied consumers' needs. IDEO is one of the successful product development companies, it established in 1978 and rename to IDEO in 1991. To be more specific, in 1978, David Kelley established the David Kelley Design, because he found that the most of technological companies are lacking product development departments. After 13 years, David Kelley Design combines with ID Two and Matrix Product Design formed new product development firm in 1991 and renamed IDEO. As one of the world's leading design firms, IDEO won a large number of awards than other product development firms. This company has a rapidly development in last several years, owned over 660 employees in the various disciplines, such as behavior science, electrical engineering and design research et al. (IDEO 2015). As a product development firm, IDEO help organizations in the public and private sectors to find new design approach to innovate and grow. Sutton et al. (1996) reported that IDEO as a successful design company, they helped at least 40 industries to innovate and over 3000 products to development. This essay will be analyzed its process, organization, management and culture, to explore the reason of its success.

Branding and Product Design Monika Hestad, 2016-04-15 Why do winning brands appear to be more creative and authentic than less successful ones Despite the strong link between famous brands and the products sold under their name there is still a gap in understanding the relationship between product design and brand building Monika Hestad plugs that gap Branding and Product Design discusses key questions about the link between product and brand and about design processes and innovation It examines these questions on both macro and micro levels and provides the reader with tools to

help understand the role of products in building a brand and how to bring the brand and the product design process together. These are based on the author's research into branding and product design, her years of teaching these topics and her own industrial practice. Qualitative interviews delivering an insider perspective on major brands bring abstract concepts to life. The book includes case studies from well-known and up-and-coming brands and will prove invaluable to design practitioners, marketers, managers and other professionals working close to designers. It will also benefit those teaching and studying, particularly if they are involved in the new higher education programmes where business schools and design schools are co-operating to reflect the intersection between design and branding.

Brilliance by Design Vicki Halsey, 2025-01-07. Many subject matter experts are just that: subject matter experts, not experts in the art of teaching, facilitating or designing. Thousands of authors, trainers and speakers have great content but they lack the skills required to convey their content in a way that inspires learners to unleash their brilliance and move the learning to practice. They often spend 70% of their time on WHAT they are going to teach and 30% of their time on HOW, when they should be spending 30% on WHAT and 70% on HOW. Their instructional techniques often are at odds with their message of inclusivity, eagerness for people to learn and hopes that their content will change lives and organizations. *Brilliance by Design* outlines how to design learning interactions such as meetings and workshops that enable people to do their best thinking. Using the tested signature ENGAGE model, it helps anyone who brings people together for the purpose of learning, problem solving or innovating to develop a clear, high-impact training design that unleashes brilliance. It presents a model that enables teachers to analyze learner and teacher needs, create objectives that meet those needs and incorporate interactive tools that fire them up, ensuring all key outcomes are met. To help readers unleash the brilliance in others, this book provides the structure, tools, language and models needed to create optimal learning experiences from their ideas, practices, models and books. In learning these techniques, readers will achieve powerful outcomes, building communities of learners who share best practices and communicate at a deep and profound level while doing real work.
