and horticultural systems are encountering challenges related to resource availability agrochemical restrictions and production costs. The use of biostimulants as plant strengtheners and green biotechnological strategies offers potential solutions. However there are limitations to their field application making it crucial to bridge the gap between lab research and practical implementation. Meanwhile the need for safe and environmentally friendly practices to ensure sustainable food production in challenging climates is growing. This Research Topic aims to explore the field application of biostimulants and novel biotechnological approaches for enhancing crop productivity and stress tolerance. We invite authors to submit research papers on the application of biostimulants in cropping systems under field conditions including arable and permanent crops

Farmer Producer companies in India: Road map to ensure sustainability Dr. U.K. Srivastava, Dr. Pramila Srivastava, 2024-01-06 In India a significant majority of farmers specifically small and marginal ones hold 86 percent of operational land and cover 47 percent of the operating area These farmers encounter challenges in production and post production stages such as accessing technology quality inputs at reasonable prices seed production custom hiring value addition processing credit investments and crucially markets Farmer producer companies FPOs are emerging as effective tools for building integrated value chains aiming to address these challenges and ensure better income for farmers While around 7 000 FPOs were registered by 2019 many became defunct Learning from this the government initiated the promotion of 10 000 FPOs with various incentives in the 2018 19 budget These measures including equity support credit guarantees and expense coverage aim to create sustainable FPOs contingent on effective management financial literacy profitability and tangible benefits for members The book focuses on evaluating the performance and sustainability of Farmer Producer Companies through 16 chapters offering valuable insights for stakeholders such as FPOs policymakers agro entrepreneurs bankers and agricultural students A multi-billion-dollar opportunity - Repurposing agricultural support to transform food systems Food and Agriculture Organization of the United Nations, United Nations Development Programme, United Nations Environment Programme, 2021-09-14 Public support mechanisms for agriculture in many cases hinder the transformation towards healthier more sustainable equitable and efficient food systems thus actively steering us away from meeting the Sustainable Development Goals and targets of the Paris Agreement This report sets out the compelling case for repurposing harmful agricultural producer support to reverse this situation by optimizing the use of scarce public resources strengthening economic recovery from the COVID 19 pandemic and ultimately driving a food systems transformation that can support global sustainable development commitments The report provides policymakers with an updated estimate of past and current agricultural producer support for 88 countries projected up until 2030 The trends emerging from the analysis are a clear call for action at country regional and global levels to phase out the most distortive environmentally and socially harmful support such as price incentives and coupled subsidies and redirecting it towards investments in public goods and services for agriculture such as research and development and infrastructure as well as

decoupled fiscal subsidies Overall the analysis highlights that while removing and or reducing harmful agricultural support is necessary repurposing initiatives that include measures to minimize policy trade offs will be needed to ensure a beneficial outcome overall The report confirms that while a few countries have started repurposing and reforming agricultural support broader deeper and faster reforms are needed for food systems transformation Thus it provides guidance in six steps on how governments can repurpose agricultural producer support and the reforms this will take
