Essentials of Nursing Law and Ethics Susan Westrick, Katherine Dempsey, 2009 *Essentials of Nursing Law and Ethics* is an authoritative resource designed to meet the needs of both nursing students and practicing nurses This reference is a compilation of two page chapters covering topics from legal issues related to basic practice such as documentation patient teaching and confidentiality to more complex areas of end of life issues and advanced directives In addition *Essentials of Nursing Law and Ethics* includes those issues pertinent to the everyday practice of nurses including refusing patient assignment sexual harassment in the workplace and the Americans with Disabilities Act **Legal and Ethical Issues** Susan Westrick Killian, Susan J. Westrick, 2006 Blaming Mothers Linda C. Fentiman, 2019-05-01 A gripping explanation of the biases that lead to the blaming of pregnant women and mothers Are mothers truly a danger to their children's health In 2004 a mentally disabled young woman in Utah was charged by prosecutors with murder after she declined to have a Caesarian section and subsequently delivered a stillborn child In 2010 a pregnant woman who attempted suicide when the baby's father abandoned her was charged with murder and attempted feticide after the daughter she delivered prematurely died These are just two of the many cases that portray mothers as the major source of health risk for their children The American legal system is deeply shaped by unconscious risk perception that distorts core legal principles to punish mothers who fail to protect their children In *Blaming Mothers* Professor Fentiman explores how mothers became legal targets She explains the

psychological processes we use to confront tragic events and the unconscious race class and gender biases that affect our perceptions and influence the decisions of prosecutors judges and jurors Fentiman examines legal actions taken against pregnant women in the name of fetal protection including court ordered C sections and maintaining brain dead pregnant women on life support to gestate a fetus as well as charges brought against mothers who fail to protect their children from an abusive male partner She considers the claims of physicians and policymakers that refusing to breastfeed is risky to children s health And she explores the legal treatment of lead poisoned children in which landlords and lead paint manufacturers are not held responsible for exposing children to high levels of lead while mothers are blamed for their children s injuries Blaming Mothers is a powerful call to reexamine who and what we consider risky to children s health Fentiman offers an important framework for evaluating childhood risk that rather than scapegoating mothers provides concrete solutions that promote the health of all of America s children Read a piece by Linda Fentiman on shaming and blaming mothers under the law on The Gender Policy Report

useful reading to support an undergraduate programme introducing students to ethical theory The use of think boxes and short exercises is particularly useful in ensuring that theory can be contextualised and made sense of by the student in real life scenarios Academic staff may find these useful as activities to use in workshops with students Deborah C Casey Senior Lecturer in Nursing Leeds Metropolitan University UK I believe strongly that there needs to be much greater understanding of moral nursing practice particularly at a time when there has been much negative press regarding poor and undignified patient care along with a failure by nurses to advocate for the frail and vulnerable Education requires appropriate materials to enable those learning about nursing and health care This text succeeds in providing clear explanations of ethics for nurses in relatively plain English that will enable the essentials of moral caring behaviour The reader is encouraged to engage with ethical concepts and principles through think boxes points for consideration and the residents of Oak Avenue that facilitate linking theory to practice Overall the reader is guided from one subject to the next through each chapter in a logical manner that gives a useful perspective to understanding the essentials for moral nursing practice Linnette King Principal Lecturer Faculty of Health and Social Science University of Brighton UK

medicine social work and teaching has a clear moral aim to do good In the case of nursing to do good for the patient However it is vital that in the pressurised constrained health service of the 21st century we help nurses explore what this might mean for nursing practice and what can reasonably be expected of the individual nurse in terms of good nursing care

Nursing Law and Ethics Amnon Carmi, Stanley Schneider, 2012-12-06 The papers in this section on the legal aspects of nursing can be divided into two parts a the rights and responsibilities of nurses patients and the medical system and b treatment with its legal ramifications How does one decide whether patients rights or the health professional s rights are to be considered more seriously Is there an absolute right or wrong Since legal rights are sanctioned by constantly changing social and political climates this may in effect diminish the possibility of anything absolute The question of the equivalency of legal and moral rights is also addressed Due to the prevalent vagueness with regard to bioethical issues as they affect human and legal rights often we become absorbed in philosophical polemics without being able to arrive at anyone answer In order to move beyond the ethical theoretical formulations there is daily confrontation in the nursing profession the practical application of theoretics
