Regulating (From) the Inside Iris H-Y Chiu, 2015-11-05 This book examines a key aspect of the post financial crisis reform package in the EU and UK the ratcheting up of internal control in banks and financial institutions The legal framework for internal controls is an important part of prudential regulation and internal control also constitutes a form of internal gate keeping for financial firms so that compliance with laws and regulations can be secured This book argues that the legal framework for internal control which is a form of meta regulation is susceptible to weaknesses and such weaknesses are critically examined by adopting an interdisciplinary approach The book discusses whether post crisis reforms adequately address the weaknesses in regulating internal control and proposes an alternative strategy to enhance the governance effectiveness of internal control

The Regulation of Megabanks Katarzyna Parchimowicz, 2022-11-22 Global systemically important banks G SIBs are the largest most complex and in the event of their potential failure most threatening banking institutions in the world The Global Financial Crisis GFC was a turning point for G SIBs many of which contributed to the outbreak and severity of this downturn The unfolding of the GFC also revealed flaws and omissions in the legal framework applying to financial entities In the context of G SIBs it clearly demonstrated that the legal regimes both in the USA and in the EU grossly ignored the specific character of these institutions and their systemic importance complexity and individualism As a result of this omission these megabanks were long treated like any other smaller banking institutions Since the GFC legal systems have changed a lot on both sides of the Atlantic and global and national lawmakers have adopted new rules applying specifically to G SIBs to reduce their threat to financial stability This book explores whether the G SIB specific regulatory frameworks are adequately tailored to their individualism in order to prevent them from exploiting overly general rules as they did during the GFC Analyzing the specific character and individualism of G SIBs in relation to their history normal functioning as well as their operations during the GFC this book discusses transformation of banking systems and the challenges and opportunities G SIBs face such as Big Tech competitors climate related requirements and the COVID 19 pandemic Taking a multidisciplinary approach which combines financial aspects of operations of G SIBs and legal analysis the book describes G SIB oriented legal frameworks of the EU and the USA and assesses whether G SIB individualism is adequately reflected analyzing trends in supervisory action when it comes to discretion in the G SIB context all in order to contribute to the ongoing discussions about international banking law its problems and potential remedies to such persistent flaws

Sustainability Rating Agencies vs Credit Rating Agencies Daniel Cash, 2021-04-16 This book details the difference between the two rating industries but this difference is converging all the time The concept of investing in a more

responsible and sustainable manner is drawing in some of the world's leading investors and with its regulations and policies are developing at the highest levels. However, the market is not getting what it needs to fully submit to the concept of responsible investing. It has called for more to be done from those tasked with injecting information into their processes and two industries in particular have been identified as being natural partners. It has been suggested that they are on a collision course to serve the mainstream investor and in this book that collision course is contextualised, explained, presented and finally its outcome predicted. The Currency of Solidarity Vestert Borger, 2020-10-08. Analyses the European Union's constitutional transformation during the euro crisis especially the interaction between politics and the ECJ in its materialization. *Wertpapierrecht der Security Token Offerings* Maurice Ribak, 2023-03-15. Nachdem die BaFin Security Token als Wertpapiere sui generis einstuft und dem Kapitalmarkt und prospektrechtlichen Wertpapierbegriff unterstellt scheinen viele Fragen in diesem Bereich geklärt zu sein. Doch ist die Verwaltungsauffassung dogmatisch überzeugend. Durch eine umfassende Einordnung von Security Token als Wertpapiere im zivil und aufsichtsrechtlichen Sinne untersucht Maurice Ribak diese Fragestellung. Dabei wird erkennbar, dass das zivilrechtliche Verbriefungserfordernis technisch erfüllt werden kann. Die mit der Verkörperung der Gedankenerklärung erreichten Eigenschaften sind auch ausserhalb des eWpG durch die Blockchain und das darin geführte Transaktionsregister abbildbar. Security Token sind mit klassischen Wertpapieren funktional vergleichbar. Damit sind Security Token auch aufsichtsrechtlich als Wertpapiere zu erfassen, denn die Anforderungen des Wertpapierbegriffs der MiFID II Richtlinie sollen einen effektiven Handel sicherstellen. Dies gewährleistet die zivilrechtliche Erfassung von Security Token.
