Perfecting Social Skills Richard M. Eisler, Lee W. Frederiksen, 2012-12-06 That man is a social being is almost axiomatic Our interpersonal relations can be sources of the most rewarding or the most painful of human experiences To a large measure our accomplishments in life depend on the facility with which we interact with others our social skill The acquisition of social skills is of course a natural part of the overall socialization process However in many instances it becomes necessary or desirable to develop further an individual s social facilities Such skill development is the topic of this book Two major goals were kept in mind in the writing of this book The first was to provide a conceptual framework within which to view social skills Such a framework allows one to understand why it is important to develop social skills and the effects that such skill development should have If the reader has a thorough understanding of the concept of social skills and their development it becomes possible to make appropriate innovations and adaptations to his or her own circumstances Without such a framework social skills training becomes little more than a collection of disjointed techniques Also without a conceptual understanding procedural innovations are difficult to incorporate into training *Resources in Education*, 2001
