

Chapter 4 Notes

Consumer Surplus and the Demand Curve:

- Willingness to Pay and the Demand Curve
 - Willingness to pay: the maximum price at which one would buy a good.
- Willingness to Pay and Consumer Surplus
 - Individuals consumer surplus: the net gain to an individual buyer from the purchase of a good; equal to the difference between the buyer's willingness to pay and the price paid.
 - The sum of the individual consumer surpluses achieved by all the buyers of a good is known as the total consumer surplus achieved in the market.
 - *The total consumer surplus generated by purchases of a good at a given price is equal to the area below the demand curve but above that price.*

Producer Surplus and the Supply Curve:

- Cost and Producer Surplus
 - The lowest price at which a potential seller is willing to sell has a special name in economics: it is called the seller's cost.
 - When someone sells something, there is an opportunity cost, which would be the absence of that good/service.
 - The net gain, the difference between the price he actually gets and his cost—the minimum price at which he would have been willing to sell—is known as his individual producer surplus.
 - As in the case of consumer surplus, we can add the individual producer surpluses of sellers to calculate the total producer surplus, the total net gain to all sellers in the market.
 - Economists use the term producer surplus to refer to either individual or total producer surplus.
 - The height of Andrew's step is \$5, his cost. This forms the bottom of a rectangle, with \$30, the price he actually receives for his book, forming the top. The area of this rectangle, is his producer surplus.
 - *The total producer surplus from sales of a good at a given price is the area above the supply curve but below that price.*

The Gains From Trade:

- The sum of consumer and producer surplus is known as the total surplus generated in a market.

Why Governments Control Prices:

- In other words, there is often a strong political demand for governments to intervene in markets. And powerful interests can make a compelling case that a market intervention
