Proceedings of the Third International Scientific Conference “Intelligent Information Technologies for Industry” (IITI’18) Ajith Abraham,Sergey Kovalev,Valery Tarasov,Vaclav Snasel,Andrey Sukhanov,2018-12-05 This book contains papers presented in the main track of IITI 2018 the Third International Scientific Conference on Intelligent Information Technologies for Industry held in Sochi Russia on September 17 21 The conference was jointly co organized by Rostov State Transport University Russia and V B Technical University of Ostrava Czech Republic with the participation of Russian Association for Artificial Intelligence RAAI IITI 2018 was devoted to practical models and industrial applications related to intelligent information systems It was considered as a meeting point for researchers and practitioners to enable the implementation of advanced information technologies into various industries Nevertheless some theoretical talks concerning the state of the art in intelligent systems and soft computing were also included into proceedings

Behavioral Modeling and Simulation National Research Council,Division of Behavioral and Social Sciences and Education,Board on Behavioral, Cognitive, and Sensory Sciences,Committee on Organizational Modeling: From Individuals to Societies,2008-07-04 Today s military missions have shifted away from fighting nation states using conventional weapons toward combating insurgents and terrorist networks in a battlespace in which the attitudes and behaviors of civilian noncombatants may be the primary effects of military actions To support these new missions the military services are increasingly interested in using models of the behavior of humans as individuals and in groups of various kinds and sizes Behavioral Modeling and Simulation reviews relevant individual organizational and societal IOS modeling research programs evaluates the strengths and weaknesses of the programs and their methodologies determines which have the greatest potential for military use and provides guidance for the design of a research program to effectively foster the development of IOS models useful to the military This book will be of interest to model developers operational military users of the models

and their managers and government personnel making funding decisions regarding model development

Success in Evolutionary Computation Yin Shan, 2008-02-29 Darwinian evolutionary theory is one of the most important theories in human history for it has equipped us with a valuable tool to understand the amazing world around us There can be little surprise therefore that Evolutionary Computation EC inspired by natural evolution has been so successful in providing high quality solutions in a large number of domains EC includes a number of techniques such as Genetic Algorithms Genetic Programming Evolution Strategy and Evolutionary Programming which have been used in a diverse range of highly successful applications This book brings together some of these EC applications in fields including electronics telecommunications health bioinformatics supply chain and other engineering domains to give the audience including both EC researchers and practitioners a glimpse of this exciting rapidly evolving field

Encyclopedia of Information Science and Technology, Third Edition Khosrow-Pour, D.B.A., Mehdi, 2014-07-31 This 10 volume compilation of authoritative research based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities prospective solutions and future directions in the field of information science and technology Provided by publisher

Computational Intelligence Andries P. Engelbrecht, 2007-10-22 Computational Intelligence An Introduction Second Edition offers an in depth exploration into the adaptive mechanisms that enable intelligent behaviour in complex and changing environments The main focus of this text is centred on the computational modelling of biological and natural intelligent systems encompassing swarm intelligence fuzzy systems artificial neural networks artificial immune systems and evolutionary computation Engelbrecht provides readers with a wide knowledge of Computational Intelligence CI paradigms and algorithms inviting readers to implement and problem solve real world complex problems within the CI development framework This implementation framework will enable readers to tackle new problems without any difficulty through a single Java class as part of the CI library Key features of this second edition include A tutorial hands on based presentation of the material State of the art coverage of the most recent developments in computational intelligence with more elaborate discussions on intelligence and artificial intelligence AI New discussion of Darwinian evolution versus Lamarckian evolution also including swarm robotics hybrid systems and artificial immune systems A section on how to perform empirical studies topics including statistical analysis of stochastic algorithms and an open source library of CI algorithms Tables illustrations graphs examples assignments Java code implementing the algorithms and a complete CI implementation and experimental framework Computational Intelligence An Introduction Second Edition is essential reading for third and fourth year undergraduate and postgraduate students studying CI The first edition has been prescribed by a number of overseas universities and is thus a valuable teaching tool In addition it will also be a useful resource for researchers in Computational Intelligence and Artificial Intelligence as well as engineers statisticians operational researchers and bioinformaticians with an interest in applying AI or CI to solve problems in their domains Check
