Corporate Responses to EU Emissions

Trading Jon Birger Skjærseth, Per Ove Eikeland, 2016-05-13 The European Union EU aims to put Europe on track toward a low carbon economy In this striking challenge the EU Emissions Trading System EU ETS has been singled out as the Union's key climate policy instrument ultimately aimed as a model for a global carbon market The learning effect of the EU ETS could thus be tremendous This study explores how the EU ETS actually works on the ground affecting corporate climate strategies It covers general sector responses as well as systematic comparative studies of companies across the sectors The latter enables improved understanding of causal effects and the role of interaction between different policy instruments and other factors that impact corporate climate strategies The study explores a broad set of mechanisms at play potentially linking the EU ETS to company climate strategies These include how corporate norms of responsibility are affected by the EU ETS and how economic incentives provide opportunities for innovation The book's main contribution lies in its systematic examination of corporate responses to the EU ETS from a broad empirical and analytical social science perspective covering companies in all main EU ETS sectors electric power oil cement steel and pulp and paper

Climate Change Edmond A. Mathez, 2009-05-08

Climate Change is geared toward a variety of students and general readers who seek the real science behind global warming Exquisitely illustrated the text introduces the basic science underlying both the natural progress of climate change and the effect of human activity on the deteriorating health of our planet Noted expert and author Edmond A Mathez synthesizes the work of leading scholars in climatology and related fields and he concludes with an extensive chapter on energy production anchoring this volume in economic and technological realities and suggesting ways to reduce greenhouse gas emissions *Climate Change* opens with the climate system fundamentals the workings of the atmosphere and ocean their chemical interactions via the carbon cycle and the scientific framework for understanding climate change Mathez then brings the climate of the past to bear on our present predicament highlighting the importance of paleoclimatology in understanding the current climate system Subsequent chapters explore the changes already occurring around us and their implications for the future In a special feature Jason E Smerdon associate research scientist at Lamont Doherty Earth Observatory of Columbia University provides an innovative appendix for students

Improving Modeling Tools to Assess Climate Change Effects on Crop Response Jerry L. Hatfield, David Fleisher, 2020-01-22

Crop model intercomparison and improvement are required to advance understanding of the impact of future climate change on crop growth and yield The initial efforts undertaken in the Agriculture Model Intercomparison and Improvement Project AgMIP led to several observations where crop models were not adequately simulating growth and development These studies revealed where enhanced efforts should be undertaken in experimental data to quantify the carbon dioxide temperature water interactions in plant growth and yield International leaders in this area held a symposium at the 2013 ASA CSSA and SSSA Annual Meeting to discuss this topic This volume in the *Advances in Agricultural Systems Modeling* series presents experimental observations across crops and simulation

modeling outcomes and addresses future challenges in improving crop simulation models IN PRESS This book is being published according to the Just Published model with more chapters to be published online as they are completed

Housing Market Response to Sea-Level Rise in Florida Risa Palm,Toby Bolsen,2021-11-17 South Florida continues to attract new residents despite its susceptibility to sea level rise This book explores the views of real estate agent with respect to how prospective homebuyers assess the risk of flooding It reports on their observations as to whether house prices are stagnant or falling in coastal areas vulnerable to flooding and their conclusions after working with prospective homebuyers as to whether coastal south Florida is a good place to find a home or alternatively a risky investment in a place that will eventually be submerged by rising seas The book reports on a 2020 survey of real estate agents and concludes that it is not clear that the housing market has integrated flood risk either into reduced demand for housing or in reduced prices for houses susceptible to flooding These conclusions have important implications for understanding how the risks of climate change and sea level rise are reflected in the housing market both now and in the near term future

Air Transport and the Environment Ben Daley,2016-04-01 Air Transport and the Environment provides an overview of the main issues relating to aviation environmental impacts It explains the challenge facing policymakers in terms of sustainable development focusing on the importance of balancing the industry s economic social and environmental costs and benefits both for people living now and for future generations Individual chapters review the current scientific understanding of the main aviation environmental impacts climate change local air pollution and aircraft noise Various responses to those issues are also considered including a range of policy options based on regulatory market based and voluntary approaches Key concepts such as environmental capacity radiative forcing and carbon offsetting are explained In addition the book emphasises the main implications of aviation environmental issues for policymakers and for the management of the air transport industry Debates about the environmental impacts of flying often generate strongly polarised reactions yet this book adopts a constructive approach to the subject and attempts to present the environmental issues in a clear straightforward manner It aims to provide a policy relevant synthesis of a wide range of perspectives rather than advocating one particular viewpoint Yet the central purpose of this book is to bring the sustainable development challenge facing the air transport industry to the fore and so to inform effective policy responses Air transport plays a critical role in supporting economies and societies that are increasingly interconnected by globalisation this book presents the view that the vital economic and social benefits of the air transport industry should not be lost and in fact could be distributed far more widely and equitably but that the environmental impacts of air transport nevertheless require urgent and effective management Air Transport and the Environment has been written primarily for professionals in the air transport industry policymakers and regulators It is also intended for use by academic researchers students and others who are interested in the complex relationship between air transport and the environment

Sustainability David Mollica,2017-03-02 Sustainability is one of the key concepts underlying our thinking about corporate responsibilities particularly with respect to the environment and inter generational justice but also in relation to corporate governance and the long term economic viability The advantages of the discourse of Sustainability are that it brings together contemporary economic and moral imperatives in the context of scientific knowledge Its disadvantages relate to its open ended content its systematic ambiguity and the internal tensions between economic growth human survival and global justice The essays in this volume reflect these strengths and weaknesses from a variety of viewpoints economic scientific social and philosophical They illustrate and illuminate the varied and contested content and utility of this currently

popular concept and point to its multiple implications for the development of corporate responsibilities *Climate Change*

Report on Climate Change **Ice Shelf** Yves Earhart, AI, 2025-02-12 Ice Shelf explores the critical role of these vast floating ice platforms in our planet's climate system. These extensions of glaciers found predominantly in Antarctica and Greenland act as crucial buttresses slowing the flow of land-based ice into the ocean. While their disintegration doesn't directly raise sea levels, their loss accelerates the discharge of grounded ice significantly contributing to sea level rise. The book delves into processes such as basal melting and iceberg calving fundamental to understanding ice shelf dynamics. The book traces the evolution of our understanding of ice shelves from early explorations to the sophisticated satellite observations of today. It emphasizes the social and economic implications of ice shelf loss particularly for vulnerable coastal communities. Using diverse data sources it examines changes in ice shelf extent and thickness connecting glaciology, oceanography and climatology. Ice Shelf presents a comprehensive yet accessible overview. The book progresses logically first introducing the fundamental properties of ice and ocean interactions. It then analyzes the processes controlling ice shelf mass balance dedicating chapters to basal melting, surface melting and iceberg calving. Finally it discusses observed changes in Antarctica and Greenland and their implications for global sea level rise providing a holistic view of these Earth Science giants.

Experiences of Climate Change Adaptation in Africa Walter Leal Filho, 2011-08-08 It is widely acknowledged that in addition to global and regional efforts to cope with climate change by means of mitigation measures, adaptation initiatives can and perhaps should play a key role in enabling communities from across Africa to better handle the problems related to it. Due to the fact that experiences in climate change adaptation in Africa are poorly documented, this book provides an attempt to address the perceived need for better documentation and dissemination of African experiences on climate change adaptation. *Sensitivity of permafrost to climate warming in Canada*, *Physical Education, Health and Education*

Innovation, volume II David Manzano Sánchez, Manuel Gómez-López, Jorge Carlos-Vivas, Paulo Jorge Martins, Noelia Belando Pedreño, 2025-06-05 This is the second volume of a successful collection. Please see the first volume [here](#). Today's society demands to train children and adolescents who develop in an environment based on respect and the promotion of educational values. This aspect is especially relevant to promoting physical activity and its relationship with healthy habits such as the consumption of unprocessed foods, the reduction of a sedentary lifestyle and the improvement of adherence to sports. In this sense, the World Health Organization warns that the current rates of overweight and obesity are very high and that we must combat them. From formal education, you can help improve healthy habits with educational programs and especially in Physical Education, a subject where the work of physical, social and cognitive well-being has special relevance. Since the 20th century, studies and research that have aimed to combat unhealthy habits in educational centers and sports schools have increased. Not only by promoting physical activity within the school but above all by seeking to generate adherence towards

the future of students and athletes Different researchers and statistical analyses have indicated how overweight rates increase while physical activities are reduced especially as the Secondary Education stage progresses therefore it is questionable to say what can we do to reverse this trend and continue promoting physical activity So that this motivation is not reduced and harmful behaviors grow over the years such as alcohol or tobacco consumption malnutrition or a sedentary lifestyle and their consequent diseases such as diabetes cancer or cardiovascular problems For all these reasons the objective of this Research Topic is to receive research both empirical and reviews where the promotion of healthy habits related to physical activity nutrition and mental well being through innovative programs is highlighted Within formal education at any educational stage including child primary secondary and university students We welcome contributions in the following topics not limited to Community Engagement in Health Education Explore how involving families and communities boosts the effectiveness of programs promoting physical activity and healthy habits in young people Nutrition Integration in Physical Education Investigate new ways to blend nutrition education seamlessly into physical education curricula promoting healthier lifestyles among students Outdoor Activities and Mental Health Examine the positive impact of outdoor education and nature based activities on youth physical activity levels and mental well being Professional Development for PE Teachers Explore how ongoing training equips educators to effectively promote physical activity and health among students in schools In sum the work of sports psychology in any extracurricular activity or sport has a special place in this Research Topic especially in young athletes to improve their adherence in the present and future

Totality Inside Out Kevin Floyd, Jen Hedler Phillis, Sarika Chandra, 2022-01-18 However divergent their analyses may be in other ways some prominent anti capitalist critics have remained critical of contemporary debates over reparative justice for groups historically oppressed and marginalized on the basis of race gender sexual identity sexual preference and or ability arguing that the most these struggles can hope to produce is a more diversity friendly capital Meanwhile scholars of gender and sexuality as well as race and ethnic studies maintain that by elevating the socioeconomic above other logics of domination anti capitalist thought fails to acknowledge specific forms and experiences of subjugation The thinkers and activists who appear in *Totality Inside Out* reject this divisive logic altogether Instead they aim for a more expansive analysis of our contemporary moment to uncover connected sites of political struggle over racial and economic justice materialist feminist and queer critique climate change and aesthetic value The re imagined account of capitalist totality that appears in this volume illuminates the material interlinkages between discrepant social phenomena forms of oppression and group histories offering multiple entry points for readers who are interested in exploring how capitalism shapes integral relations within the social whole Contributors Brent Ryan Bellamy Sarah Brouillette Sarika Chandra Chris Chen Joshua Clover Tim Kreiner Arthur Scarritt Zoe Sutherland Marina Vishmidt
