Canadian Social Policy, Fifth Edition Anne Westhues, Brian Wharf, 2012-05-25
Social policy shapes the daily lives of every Canadian citizen and should reflect the beliefs of a majority of Canadians on just approaches to the promotion of health, safety, and well-being. Too often those on the front lines—social workers, nurses, and teachers—observe that policies do not work well for the most vulnerable groups in society. In the first part of this new edition of *Canadian Social Policy*, Westhues and Wharf argue that service deliverers have discretion in how policies are implemented and the exercise of this discretion is how citizens experience policy, whether or not it is fair and reasonable. They show the reader how social policy is made and they encourage active citizenship to produce policies that are more socially just. New material includes an examination of the reproduction of systemic racism through the implementation of human rights policy and a comparative analysis of the policy making process in Quebec and English Canada. The second part of the book discusses policy issues currently under debate in Canada. Included are new chapters that explore parental leave policies and housing as a determinant of health. All chapters contain newly updated statistical data and research and policy analysis. A reworked section on the process of policy making and the addition of questions for critical reflection enhance the suitability of the book as a core resource in social policy courses. The final chapter explores how front line workers in the human services can advocate for change in organizational policies that will benefit the people supported.

Falling ill to depression has given me firsthand experience into the world of mental illness. My first book Mindful Wellness: The Happiest Place in the World came about through my work with people diagnosed with a mental illness. There was some missing link in their development. The research I discovered unveiled a length of time between onset of illness, diagnosis, treatment, and finally management or maintenance. The missing links were obvious to some but not so to others who waited years for a correct diagnosis and then more years to come for the correct treatment and waiting for the side effects of medication to lessen. I started writing this next chapter of Mindful Wellness and got the name for this new book from my son Corey who suggested I call it Being Happy. This book became my main focus for treatment along with medication and a balanced lifestyle. I asked myself: had I been ill with this for some time, was I not receiving the correct treatment? Luckily for me, I wasn't missing too many links in my development. However, this illness did knock me for six. When you become almost demonised with such an alienating, fearful illness, you see no way out. All that you have learnt has disappeared and you struggle to get back to a reality that used to work for you. I am hoping that this book Mindful Wellness: Being Happy rewards you as much as the journey has rewarded me. I take my hat off to all who suffer and pray that one day you will be healed from yourself and live a life of mindful wellness, being happy. Human Behavior for Social Work Practice Wendy L. Haight, Edward H. Taylor, Ruth Soffer-Elnekave, 2020. The primary goal of this text is to support social work students in HBSE 1 courses to develop a conceptual framework for understanding and meeting the challenges they will likely encounter in 21st-century practice. Through contemporary scholarship in human development, ecology, and systems theory, we build on social work's classic bio-psycho-social-spiritual framework. Our interdisciplinary developmental-ecological systems framework addresses the ways in which human beings shape and are shaped within complex and dynamic national and international contexts across the lifespan. We attempt to establish a bridge between undergraduate courses in the social, behavioral, and biological sciences and social work practice courses. We begin by establishing a framework for understanding human behavior in the social environment through chapters

providing an historical overview of the interdisciplinary roots of the developmental ecological systems framework the brain and development and the role of empirical evidence on social work practice Then we examine social work issues at various points in human development using specific programs and policies to illustrate developmentally and culturally sensitive social work practice These chapters include excerpts from interviews with practicing social workers Part 3 focuses on social work issues affecting individuals across the lifespan and around the globe through chapters on disability and stigmatization race racism and resistance women and gender and terrorism

Rich, Harold Takooshian, 2017-08-01 How can psychology professors in the USA and other nations make their courses more international This question is addressed in this indispensable new sourcebook co authored by 73 contributors and editors from 21 countries In recent decades psychology has evolved from an American dominated discipline to a much more global discipline Preliminary estimates by Zoma and Gielen 2015 suggest that approximately 76% 78% of the world s one million or so psychologists reside outside the U S However most textbooks in the field continue to rely predominantly on research conducted in North America and Europe Our book is intended to introduce psychology instructors to a variety of broad perspectives as well as specific suggestions that can support their efforts to internationalize their course offerings at both the undergraduate and graduate levels In this way they can prepare their students to become more culturally sensitive and function more effectively as citizens and psychologists in the evolving globalized world To achieve these ambitious goals the editors have assembled an international group of 73 distinguished contributors who taken together have taught and conducted research in all regions of the world The chapters in the book include both core areas of psychology and subdisciplines that represent rapidly expanding and internationally important areas such as cross cultural psychology and the psychology of gender The chapters cover key topics and areas included in the course offerings of psychology departments both in the United States and in other countries In addition to a discussion of international perspectives relevant to a given area all chapters include an annotated bibliography of pertinent books articles web related materials films videos and so on Based on this information both highly experienced and less experienced psychology instructors can add globally and

culturally oriented dimensions to their respective courses This is important because universities departments and accrediting agencies increasingly put pressure on instructors to broaden and internationalize their courses As a long time international psychologist myself I see this bold new volume as a great leap forward for international psychology The 73 distinguished contributors and editors from 21 countries have carefully crafted a handbook that will be the go to resource on the topic for years to come For psychology to continue to be relevant in the 21st century it must become more international I am grateful this book will help us accomplish this challenging but rewarding goal Philip G Zimbardo Ph D Past President American Psychological Association What could be more important than understanding human behavior and the thoughts and emotions that underlie it By teaching psychology to the world we offer the possibility of using our discipline to create a better future for all of us The chapters in this excellent book help teachers of psychology move from an ethnocentric perspective to a global way of thinking about and telling about a truly international psychology Diane F Halpern Ph D Past President of the American Psychological Association and Professor of Psychology This is a brilliant unprecedented collection of international scholarship that every psychology professor and student should read The 21st century in the teaching of psychology has truly arrived with this book creating a thoroughly needed international focus for our pedagogy Frank Farley Ph D L H Carnell Professor Temple University Former President American Psychological Association APA International Council of Psychologists American Educational Research Association AERA and the Society for International Psychology Division 52 of APA Internationalizing Teaching of Psychology contains chapters authored by eminent psychologists of diverse cultural background inclusive of different cultural perspectives on range of topics of contemporary importance Thus the volume integrates research emanating from varied cultural contexts facilitating development of a truly universal psychological science The volume is a major resource for teaching courses on Cultural Cross cultural Global psychology and in enhancing internationalization of psychology Prof Janak Pandey University of Allahabad India Editor Psychology in India The State of the Art All involved in the training of psychologists will want to recommend this book which thoroughly presents an international perspective on the teaching of psychology Rich Gielen and Takooshian consider the basic nature of psychology at the same time emphasizing cultural differences and relating it all to real life As expert cross cultural researchers the contributors provide a much needed resource and up to date reference for psychologists and students as well as for any scholar interested in our discipline around the globe Laura Hernandez Guzman Ph D Professor of Psychology Universidad Nacional Autonoma de Mexico Past President of the Mexican Psychological Society Since the mid twentieth century the world has become an increasingly smaller place at least in the figurative sense And yet Western psychology has been slow to grasp the culturally limited scope of much of our science Although the movement toward a more culturally inclusive psychology had its roots at least as early as the 1960s more recent meta analyses have shown that a large percentage of the psychological literature has represented a small percentage of the world s population In Internationalizing the Teaching of Psychology
