Chapter 6: Inventory Planning and Valuation

- For most merchandising companies, merchandise inventory is the largest asset
- To be successful, must keep enough inventory on hand to meet the customers' needs but not too much to tie up money in inventory
- Often use computer systems to track inventory – provide an easier method of providing info to managers to allow them to make effective buying decisions

Section 1: The Nature of Merchandise Inventory

- The cost of merchandise available for sale consists of:
 - The cost of the beginning inventory
 - The cost of the net purchases added to the inventory during the fiscal period
- At the end of the fiscal period, cost of merchandise available for sale is divided into
 - The cost of the ending inventory – it is a current asset that will be charged as costs in future fiscal periods
 - The cost of the merchandise sold during the current fiscal period – the cost affects the amount of net income reported for this fiscal period

In East Asia, it is evident that the emergence of the knowledge-based economy is disrupting the flying geese pattern of development and creating a new industrial geography. This book gives a picture of the shifting industrial geography in the region based on accounts of the status of the knowledge-based economy in ten individual East Asian economies. For some economies, the increased production of ICT equipment and services is the pathway to the knowledge-based economy, and even to leapfrogging ahead of more advanced economies. Other economies are focused on putting in place the physical and

institutional infrastructure to connect to electronic networks and avoid the digital divide For yet others the emergence of the knowledge based economy is expanding their role in the region adding the role of ICT hub
