Capitalism and Citizenship Kathryn Dean, 2003 Can capitalism and citizenship co exist In recent years advocates of the Third Way have championed the idea of public spirited capitalism as the antidote to the many problems confronting the modern world This book develops a multi disciplinary theory of citizenship exploring the human abilities needed for its practice It then argues that capitalism impedes the nurturing of these abilities In advancing these arguments Kathryn Dean draws on the work of a wide range of thinkers including Freud Marx Lacan Habermas and Castells

The Possibility/Impossibility of a New Critical Language in Education , 2010-01-01 The critique of Critical Pedagogy in its current various trends and paths teaches me not only the shortcomings of various versions of Critical Pedagogy No less important it offers an invitation to a reflection on the limitations costs and open horizons of critique itself It is an invitation to transcend critique as such But what alternative do we have and from where or with what ears might we listen to the music of the new call What is it that awaits us outside the critical tradition that in an unproblematic manner we could use internalize or surrender ourselves to Such questions reintroduce us to Utopia They reintroduce us to the Utopia of the possibility of happiness of the kind that is neither made possible nor advocated by self abandonment and enslavement destruction of the otherness of the Other and the I This book manifests a refusal to abandon Critical Theory s telos it offers no solutions victories of the oppressed and emancipation neither does it promise peace and unproblematic consensus On the contrary all the eternal open Diasporic individual can hope for is worthy Diasporic Love of Life creativity mature forms of togetherness and eternal nomadism as a manifestation of co poiesis

The Evolution of Society Erik W. Aslaksen, 2023-02-17 This book covers the work of Erik W Aslaksen who continues to develop the view of society and its evolution published in earlier work The Social Bond Springer 2018 The Stability of Society Springer 2020 and Measures of Social Evolution Springer 2021 bringing together core material of that work with the results of recent investigations in order to present the evolution of society as an integrated and continuous story leading right up to the present time A story of human action driven by our beliefs desires and an ideology arising out of our ability to transform and exploit our environment through the development and application

of technology The distinguishing feature of the work is the treatment of society as an information processing system and applying the system methodology for handling complexity as it is applied e g in engineering This focus on information is particularly pertinent in the current circumstances where the world has arrived at a critical point in its history through the conjunction of a number of issues that appear to be spiralling out of control Global warming and the associated climate change the destruction of our environment through such processes as land clearing and industrialisation with associated loss of biodiversity the rapidly increasing visibility of the inequality in the quality of life with associated tensions and above all the determination of the US led Western alliance to cling to its hegemonial role apparently at all cost With the sophistication and proliferation of nuclear weapons the latter has the potential to bring on the end of civilisation as we know it The resolution of any of these issues depends on the information available to all parties involved and hence the availability and quality of information is seen as the crucial and overarching issue of the present time A number of aspects of this issue including the role of education economic inequality and the control of the media are treated in some detail and proposals for some small steps in the right direction are put forward

Teaching Marx Curry Malott, John M. Elmore, Mike Cole, 2013-05-01 We are in the midst of yet another global crisis in capitalism In the UK we have the most right wing and ideologically driven government since Thatcher a ruthless cabal of millionaires intent on destroying the welfare state In the US President Obama whose initial record did not live up to the expectations of many on the Left is increasingly driven by right wing republicanism and other corporate interests At the same time there are developments in Latin America in particular Venezuela which are heralding the dawn of a new politics and recovering the voice of Marx but with a twenty first century socialist focus thus giving hope to the lives of millions of working people throughout the world This is why the world media is intent on discrediting President Hugo Chavez and insisting that ordinary people have to pay the cost of the crisis in capitalism The Arab Spring and the Occupy movement also show signs of an anti capitalist movement in embryo In Greece perhaps more than anywhere else in Europe even France the austerity stricken working classes are pushing for real existing socialism It is therefore not surprising that the ruling class of Greece is increasingly supporting the neo Nazi fascist Golden Dawn party threatening civil war should they lose power as a class Now is a prescient time to bring twenty first century socialism to the educational institutions of the world to teach Marx across the curriculum and across the globe Through this volume our goal was to contribute to the literature by concretely demonstrating the practical implications of Marx's theory to curriculum However while this book provides concrete examples of how Marx can and has informed a revolutionary critical education it is not intended to be prescriptive That is the chapters should not be read as a how to guide but they should be taken as inspiration for new creative approaches to Teaching Marx and interpreting and posing The Socialist Challenge

Human Needs and Politics Ross Fitzgerald, 2016-06-21 Human Needs and Politics is a collection of papers that examines the intercorrelation between political trends and the fulfillment of society's human needs The title discusses the concepts of

human needs wants and politics Next the selection details some theories that will shed light into the mechanisms of human needs politics interaction The text also reviews Maslow s hierarchy of needs along with Marx s opinion on human needs The book will be of great interest to political scientists sociologists and behavioral scientists *Productivity and Prosperity* Karen R. Foster,2016-01-01 In *Productivity and Prosperity* Karen Foster zeroes in on the paradox of productivity that it is the key to economic prosperity and yet its connection to well being and median incomes has all but disappeared **Queer Theory in Education** William F. Pinar,1998 Theoretical studies in curriculum have begun to move into cultural studies one vibrant and increasingly visible sector of which is queer theory *Queer Theory in Education* brings together the most prominent and promising scholars in the field of education primarily but not exclusively in curriculum in the first volume on queer theory in education In his perceptive introduction the editor outlines queer theory as it is emerging in the field of education its significance for all scholars and teachers and its relation to queer theory in literacy theory and more generally in the humanities *Religion and Politics Under Capitalism* Stefan Arvidsson,2019-04-17 This book relates some of the major trends within religion and politics to offer a historical framework with which to assess their interactions and a point of departure for studies to come The study of the interrelationship between contemporary religious practice and modern politics is divided between several scholarly disciplines all embracing different terminologies as well as multiple theoretical and philosophical premises Such diversity of perspectives is to be welcomed but it can inhibit the ability of academics to form a cohesive and coherent dialogue around the subject While critically assessing the historic sociological political theological and anthropological aspects of religion and politics the book demonstrates the crucial importance of recognising the capitalist economy as the framework for understanding their dynamic relationship Moreover it claims that humanism is the proper lens through which to critically engage with religion in society and must be the favoured point of departure for any study within the field This book offers a unique overarching viewpoint for of all these divergent scholarly trends and traditions As such it will be of significant use to academics in religious studies political science sociology and anthropology Power, Ideology, and Control John C. Oliga,2007-08-20 One of the great challenges we face today is coming to grips with forces of power in both theoretical and methodological terms in a way that prepares us for action action that is not totally subject to existing forces The literature has some excellent theoretical accounts of power but these say little about what we should do Most often they are abstract and out of reach of all but a select few In this book however we have a clear cut account of power ideology and control that paves the way for practic minded people to make a genuine attempt at tackling issues of power on both organizational and societal levels John C Oliga suggests a division between what he calls objectivist subjectivist and relational perspectives With objectivism he refers to theories that focus on power as capacities located in social structures These tend to be either synergistic e g Parsonian collective or conflictual e g Marxian conflictual view theoretical orientations With subjectivism he discusses theories that focus on power possessed by agents With relational

Edward Hackett, 2018-05-15 This book brings together the author's overall research trajectory of the last five years of his life and the

questions he has been asking himself What is the person And what are values In answering the latter question Hackett arrived at an answer within the boundaries of Max Scheler the German phenomenologist but consequently started to explore the depths of which Scheler's value ontology was predicated on certain assumptions about the person From these questions Hackett started to draw upon philosophical approaches that thematize experience pragmatism and phenomenology Rooted in the philosophical contributions of Scheler and the American philosopher William James this book guides the reader through a fascinating exploration of these philosophical approaches in relation to the person and values Through thematizing experience this book reveals that the ontology of value for Scheler resides not only in a person's intentionality but also in the being of an act As such this book argues that the deficit of an ontology of value in Scheler rests on interpreting his affective intentionality in much the same way that Heidegger employed phenomenology to discern the ontological care structure of Dasein In other words for Scheler the ontology of value rests on the manner in which values were realized by a person's intentionality Moreover this book goes further to reveal that the intentional act life is the source of participation and can be understood as a process based account of value otherwise known as account participatory realism Importantly within participatory realism Hackett addresses how values have their origin in the process of intentionality since intentionality is generative of meaning As an important contribution to the field of moral metaphysics Hackett's critical reflection on the person and values provides a stimulating insight into some of the key debates surrounding pragmatism and phenomenology that will be of great interest to both experienced scholars and researchers alike

Perversions of Fascism

Antonios Vadolas, 2018-04-17 Contemporary versions of evil demonise modern fascists totalitarian threats and Hitlers As if not obscure enough fascist evil has been equivocally linked with perversion This book reveals that both fascism and perversion implicate the non symbolisable kernel in politics which becomes the source of their mystification It argues that the fascist does not take the same discursive position as the pervert does regarding this symbolic gap The author develops a new rhetoric de pathologised and de ideologised regarding the structure of the so called pervert introducing new vocabularies and directions for psychoanalytic research that further distance the pervert or whom he calls the extra ordinary subject from fascist politics and instead exposes his diachronic fascist isolation from the social edifice This reveals the fruitful alternatives that can stem from a return to Freud cum Lacan which supports a flexible on going reformulation of psychoanalytic knowledge
