

Reality check

Everyone is 'image-conscious' these days. Hundreds of advertisements tell us that, if only we used their brand of face cream or shampoo, we would look younger and more beautiful; if we ate a certain sort of food, we would be slim and healthy; and if we had this or that beauty treatment, we would look 20 years younger.

Meanwhile, the images we see on our television screens or in magazines are mainly of young, slim, good-looking people. Almost all new presenters of TV shows have to be young and sexy. Models used for fashion shows are often teenage girls who are anorexic. Girls in pop groups seem to be chosen for their looks rather than their singing voice. The 'soaps' are meant to be a reflection of real life. But look at a crowd of actors in any soap and there will only be a handful of younger actors who are not slim and good-looking.

Look at a crowd of people in the high street and there will only be one or two who *are* slim and good looking. The reality is that more and more of us are overweight. We eat the wrong sort of food and too much of it, and we don't get enough exercise. There is great concern about the number of overweight children in schools. The long term health prospects of many of us are said to be poor. Overweight people are more likely to get diabetes, suffer heart attacks and run the risk of getting diseases like cancer.

Is it a good thing that the image we are presented with in the media is of slim, young and sexy people - or should the TV screens and the DVDs reflect the reality of life, warts and all ?

1. *Underline all the words in the first 2 paragraphs which contain this sound: 'sh' (as in 'push') or 'ti' (as in 'patient')*
2.
 - a. *Underline all the words in paragraph 3 which have 'er' in them.*
 - b. *Think of some words which contain the same sound as 'er' but with a different spelling.*
e.g. 'our' in 'journey'
3. *Look at the first line of the last paragraph.*
Write down the number of syllables in each word.

Advanced Natural Language Processing with TensorFlow 2 Ashish Bansal,2021-02-04 One stop solution for NLP practitioners ML developers and data scientists to build

effective NLP systems that can perform real world complicated tasks

Key Features

- Apply deep learning algorithms and techniques such as BiLSTMs, CRFs, BPE and more using TensorFlow 2
- Explore applications like text generation, summarization, weakly supervised labelling and more
- Read cutting edge material with seminal papers provided in the GitHub repository with full working code

Book Description

Recently there have been tremendous advances in NLP and we are now moving from research labs into practical applications. This book comes with a perfect blend of both the theoretical and practical aspects of trending and complex NLP techniques. The book is focused on innovative applications in the field of NLP: language generation and dialogue systems. It helps you apply the concepts of pre-processing text using techniques such as tokenization, parts of speech tagging and lemmatization using popular libraries such as Stanford NLP and SpaCy. You will build Named Entity Recognition (NER) from scratch using Conditional Random Fields and Viterbi Decoding on top of RNNs. The book covers key emerging areas such as generating text for use in sentence completion and text summarization, bridging images and text by generating captions for images and managing dialogue aspects of chatbots. You will learn how to apply transfer learning and fine-tuning using TensorFlow 2. Further, it covers practical techniques that can simplify the labelling of textual data. The book also has a working code that is adaptable to your use cases for each tech piece. By the end of the book, you will have an advanced knowledge of the tools, techniques and deep learning architecture used to solve complex NLP problems. What you will learn:

- Grasp important pre-steps in building NLP applications like POS tagging
- Use transfer and weakly supervised learning using libraries like Snorkel
- Do sentiment analysis using BERT
- Apply encoder-decoder NN architectures and beam search for summarizing texts
- Use Transformer models with attention to bring images and text together
- Build apps that generate captions and answer questions about images using custom Transformers
- Use advanced TensorFlow techniques like learning rate annealing, custom layers and custom loss functions to build the latest DeepNLP models

Who this book is for: This is not an introductory book and assumes the reader is familiar with basics of NLP and has fundamental Python skills as well as basic knowledge of machine learning and undergraduate level calculus and linear algebra. The readers who can benefit the most from this book include intermediate ML developers who are familiar with the basics of supervised learning and deep learning techniques and professionals who already use TensorFlow Python for purposes such as data science, ML research, analysis, etc.

Cognition, Metacognition, and Reading Donna-Lynn Forrest-Pressley,T. Gary Waller,2013-03-12 We had our first conversation about cognition metacognition and reading in September of 1976 Our particular concern was with reading and learning to read and what if anything meta cognition might have to do with it all We didn t really know much about metacognition then of course but then most other people were in the same predicament Some people had been working with interesting approaches and results on metalanguage and reading among them J Downing L Ehri L Gleitman 1 Mattingly and E Ryan and it also was about that time that people were becoming aware of E Markman s first studies of comprehension monitoring Other than that perhaps the most influential item around was the perhaps already classic monograph by Kruetzer Leonard and Flavell on what children know about their own memory Also in the air at that time were things like A Brown s notions about knowing knowing about know ing and knowing how to know D Meichenbaum s ideas about cognitive behavior modification and the work by A Brown and S Smiley on the awareness of important units in text Even though these developments were cited as new and innovative it was not the case that psychologists had never before been of questions They certainly interested in or concerned with metacognitive sorts had as clearly evidenced by the notion of metaplans in Miller Galanter and Pribram s Plans and the Structure of Behavior
