How to Analyze People Micheal Kratom, 2015-10-09 Analyzing people at first glance is natural We all do it and there is no point in denying it Through instinct and experience some people are better in this process than others This is also undeniable However science and research has made it possible to learn a few ways to make sure that the analysis we make of the people that we meet for the first time is not based only on instinct and experience but also on undeniable scientific facts *How to Analyze People* has the purpose of presenting those ways to the general public to explain them and to point out the necessity of incorporating them into our way of sizing up people and drawing our conclusions about them Many texts speak only about the ways of observing the eyes Other texts refer to the body language or non verbal communication as it has become to be known A few more texts refer to how the pitch and intonation of a voice carries out the messages These are all gathered up in one text so that the total sum of the observations that need to be made in order to make our analysis as correct as possible and draw a correct conclusion out of it is brought to common knowledge in the hopes of avoiding misunderstandings and unnecessary emotional outbreaks that may lead to unfortunate and regrettable actions Actions that are unbecoming to a modern and peaceful society Download Your Copy Now Click the Buy Now button on the top of the page
