Climate Change and Aviation Stefan Gossling, Paul Upham, 2012-05-04 This is a timely challenging and fascinating book on a topic of central

importance to the success or otherwise of our climate change policies It sets down a clear marker for what has to be done in the aviation sector Professor John Whitelegg Stockholm Environment Institute University of York UK Climate Change and Aviation presents a clear picture of the transport sector's greatest challenge how to reconcile aviation's immense popularity with its considerable environmental damage and its dependence on liquid hydrocarbon energy sources This book avoids wishful thinking and takes the much harder but more productive path of considering difficult solutions that clash with short term and short sighted expectations about the unlimited growth potential for flying Professor Anthony Perl Urban Studies Program Simon Fraser University Canada A convincing and timely collection that brings together an impressive range of expertise The book integrates various perspectives into a powerful core argument we must do something and quickly to tackle the impact of aviation on our environment The authors recognise the political difficulties associated with promoting change but present constructive options for policy makers Required reading especially for transport ministers set on promoting the growth of air travel Professor Jon Shaw Director of the Centre for Sustainable Transport University of Plymouth UK Trends such as the massive growth in availability of air travel and air freight are among those which have led to aviation becoming one of the fastest growing emitters of greenhouse gases These trends have also caused a shift in expectations of how we do business where we go on holiday and what food and goods we can buy For these reasons aviation is and is set to stay high up on global political organizational and media agendas This textbook is the first to attempt a comprehensive review of the topic bringing together an international team of leading scientists Starting with the science of the environmental issues it moves on to cover drivers and trends of growth socio economics and politics as well as mitigation options the result being a broad yet detailed examination of the field This is essential reading for undergraduate and postgraduate courses in transport tourism the environment geography and beyond while also being a valuable resource for professionals and policymakers seeking a clear understanding of this complex yet urgently pressing issue

Mastering the Travel Intermediaries Ben Vinod, 2024-06-25 This book chronicles the role of travel intermediaries global distribution systems GDS travel management companies TMC and online travel agencies OTA in the distribution of travel products The book covers the historical development of these intermediaries and explores their current state and future prospects Almost six decades after the introduction of computerized reservations systems and four decades after the introduction of Global Distribution Systems that allowed travel agents to make automated airline bookings the distribution of air products is amid a major transition A fundamental change is pricing power which shifts from the GDSs to the airlines for the indirect channel These changes are driven by advancements in technology market economics and airline cost controls leading to the emergence of new revenue models that will permanently alter the landscape of air distribution As a result travel intermediaries are experiencing the effects of these turbulent times and must adopt innovative approaches and initiatives to adapt and transform their business models rather than maintaining the status quo In addition to the ongoing transformation

over the next decade the advancements in emerging technologies like blockchain and decentralized digital identity will further revolutionize the distribution landscape across all sectors of the travel industry

Tourism, Climate Change and Sustainability Maharaj Vijay Reddy, Keith Wilkes, 2013 Other research dimensions discussed in the book are drawn from Brazil Hawaii England Australia and New Zealand

Climate Change and Tourism Susanne Becken, John Hay, 2012-06-25 The contribution of tourism to climate change and the likely consequences of climate change for key tourist destinations has been well reported and discussed Yet there is a lack of evidence based systematic practical advice as to how the tourism industry should respond to the challenge of climate change Building on a sound conceptual understanding of the links between climate change and tourism this book shows how the tourism sector might best respond It not only focuses on the roles of supportive policies and institutions in ensuring a strong enabling environment for practical responses but also on the practical responses themselves This practical approach is presented through a large number of case studies and examples which illustrate how policy and industry initiatives have been implemented in tourism and if or why they were successful The majority of examples come from places such as the Caribbean Spain the Maldives Nepal and the UK as well as Australia New Zealand and other parts of the Pacific The examples are presented within an overall framework that facilitates the translation of adaptation and mitigation policies into practice This book offers the tourism industry students and academics the opportunity to advance from the earlier more conceptual texts on tourism and climate change by taking a much more practical approach Its global coverage through the use of international case studies

fosters a cross fertilisation of ideas and initiatives This text provides a detailed analysis of best practices in the face of climate change across countries and geographically diverse tourist destinations and operations **Aircraft Valuation**
David Yu,2020-10-23 This book is one of the first to explore aviation and aircraft leasing and its values establishing it as a standalone investable asset class within the larger real assets industry Airplanes are a crucial but capital intensive component of the global economy The author as an academic researcher appraiser advisor and businessperson in the industry bridges a gap in the existing literature with his analysis of the underlying aviation asset class return and risk profile The book describes the characteristics dynamics and drivers of the global Asia and China specific aviation and leasing landscapes Recent effects of COVID 19 on aviation and an analysis of the drivers affecting cross border mergers and acquisitions in the industry are also investigated The book includes 20 years of empirical aircraft valuation evidence and analysis of its characteristics establishing the aircraft and sub segments as asset classes In addition characteristic comparisons to other real asset subclasses and benchmarks are examined This book will be of interest to academics financiers investors industry participants and more general aviation enthusiasts
