Committee for the Truck Weight Study, 1990 To help assess proposals for further changes in federal truck weight limits Congress requested this study through Section 158 of the Surface Transportation and Uniform Relocation Assistance Act of 1987 To conduct the study the National Research Council convened a special Transportation Research Board committee with experts in pavements bridges highway safety freight transportation economics motor vehicle design highway administration motor carrier operations and enforcement of motor vehicle regulations The study focused on four issues identified in the study request that involve potential changes to federal weight limits for Interstate highways 1 Elimination of existing grandfather provisions 2 Alternative methods for determining gross vehicle weight and axle loadings 3 Adequacy of the current federal bridge formula and 4 Treatment of specialized hauling vehicles garbage trucks dump trucks and other trucks with short wheel bases that have difficulty complying with the current federal bridge formula For each of these issues the study committee estimated the nationwide effects of changes in federal limits proposed by the trucking industry highway agencies and other groups Projections of heavy truck miles by type of truck region of the country highway functional class and operating weight were developed for a base case and alternative truck weight regulatory scenarios These projections were then used to estimate impacts on truck costs pavements bridges and safety *Preservation Approaches for High-traffic-volume Roadways* David G. Kay, 1999 The scope of this project included development of a means to quantify the service lives of materials used for construction of noise barriers in Illinois development of a life cycle cost model for the evaluation of alternative materials and evaluation of the need for potential changes to the Special Provisions for noise barrier construction currently used in Illinois The project included a survey of all state departments of transportation DOTs to develop information on experiences with noise barrier materials and products which showed that nationwide less than 1% of noise barriers by length have been repaired or replaced and that few DOTs use life cycle cost analysis for selection of noise barriers A comprehensive list of the materials currently approved for use in Illinois by the Illinois Highway Development Council was developed The current

condition of existing Illinois noise barriers was assessed by field observation and Illinois Department of Transportation IDOT maintenance personnel were surveyed to develop information on maintenance histories costs of repairs scheduled repair or replacement of barriers and estimated service lives of barriers in place Service life criteria were developed considering the structural acoustical and aesthetic functions of noise barriers A life cycle cost model was developed and the relative life cycle costs of existing Illinois noise barriers were computed Noise barrier specifications supplied by IDOT and the Illinois State Toll Highway Authority were reviewed and recommendations for improving the organization and content of the specifications were made
