

The Free-rider problem

As mentioned above the free rider problem will exist when people enjoy the benefits of government-provided public or merit goods without paying for them, or pays less than their fair share, or they consume more than they paid.

Not all the people who enjoy the public goods are taxpayers yet the government uses the taxpayer's money to facilitate the provision of these goods and services to the general public (Musgrave, 1995, p.1). The issue of free riding is inevitable in each and every country because of the presence of the presence of minors, tax evaders and illegal immigrants just to mention but a few.

Illegal Immigrants and their impacts

Illegal immigrants are people who enter the borders of a nation without proper immigration procedures and choose to remain in that country without permission. Such people are forced to run away from their countries because of political, religious issues as well as natural disasters.

The United States of America is one of the most preferred destinations for most illegal immigrants in the world because of its open border policy. As a matter of fact, the United States has procedures in its constitution that allow the presence of illegal immigrants in the country. Thus it is deemed to have the highest number of immigrants according to research done by the Department of Homeland Security where the population of illegal immigrant was 10.8 million in 2009 (Espenshade, 1995, p.195).

Illegal immigrants in the United States of America have led to both negative and positive impacts in terms of economic and social status. For example, they have created problems of a bilingual society, drug trafficking, traffic congestion and the free-rider problem. However, illegal immigrants contribute greatly to the society by performing tasks that the civilised Americans would not perform such as the construction industry.

The relationship between free-riding and illegal immigrants

It has for a long period of time been believed that the free-rider problem is as a result of illegal immigrants. I do not agree with this theory because I believe that those who risk their lives to cross their border are in search for the fulfilment of the American dream and not to use the freely available resources.

When this volume was published in 1990 undocumented Mexican immigrants had become an important component of the US population In this book the author analyzes the results of a unique survey conducted in Los Angeles County where an estimated 44 percent of the undocumented Mexican population lived The survey allows the author to make comparisons among the groups of undocumented and legal Mexican immigrants and to study the effects of legal status on their living conditions The author also examines the findings of a number of other social scientists providing a comprehensive summary of the data on undocumented Mexicans in the US In his conclusion he turns to an evaluation of policy options for incorporating this group into the US population and for immigrants The book will be useful to sociologists and other social scientists as well as to lawyers and policy experts studying the problem of illegal immigrants
