Legal Pluralism and Empires, 1500-1850 Richard J. Ross, 2013-07-22 Historians used to imagine empire as an imperial power extending total domination over its colonies Now however they understand empire as a site in which colonies and their constitutions were regulated by legal pluralism layered and multicentric systems of law which incorporated or preserved the law of conquered subjects By placing the study of law in diverse early modern empires under the rubric of legal pluralism Legal Pluralism and Empires 1500 1850 offers both legal scholars and historians a much needed framework for analyzing the complex and fluid legal politics of empires Contributors analyze how ideas about law moved across vast empires how imperial agents and imperial subjects used law and how relationships between local legal practices and global ones played themselves out in the early modern world The book s tremendous geographical breadth including the British French Spanish Ottoman and Russian empires gives readers the most comparative examination of legal pluralism to date Lauren Benton is Professor of History Affiliated Professor of Law and Dean of the Graduate School of Arts and Science at New York University Her books include A Search for Sovereignty Law and Geography in European Empires 1400 1900 and Law and Colonial Cultures Legal Regimes in World History 1400 1900 Richard J Ross is Professor of Law and History at the University of Illinois Urbana Champaign and Director of the Symposium on Comparative Early Modern Legal History With Steven Wilf he is currently working on a book entitled The Beginnings of American Law A Comparative Study

The World as it Is. A New and Comprehensive System of Modern Geography ... William Cooke Taylor, Charles Mackay, W. C. Stafford, 1853

Distant Tyranny Regina Grafe, 2012-01-08 Spain s development from a premodern society into a modern unified nation state with an integrated economy was painfully slow and varied widely by region Economic historians have long argued that high internal transportation costs limited domestic market integration while at the same time the Castilian capital city of Madrid drew resources from surrounding Spanish

regions as it pursued its quest for centralization According to this view powerful Madrid thwarted trade over large geographic distances by destroying an integrated network of manufacturing towns in the Spanish interior Challenging this long held view Regina Grafe argues that decentralization not a strong and powerful Madrid is to blame for Spain s slow march to modernity Through a groundbreaking analysis of the market for bacalao dried and salted codfish that was a transatlantic commodity and staple food during this period Grafe shows how peripheral historic territories and powerful interior towns obstructed Spain s economic development through jurisdictional obstacles to trade which exacerbated already high transport costs She reveals how the early phases of globalization made these regions much more externally focused and how coastal elites that were engaged in trade outside Spain sought to sustain their positions of power in relation to Madrid Distant Tyranny offers a needed reassessment of the haphazard and regionally diverse process of state formation and market integration in early modern Spain showing how local and regional agency paradoxically led to legitimate governance but economic backwardness
