

## ACR BI-RADS® Atlas 5 Edition Changes

The illustrated BI-RADS® Fifth Edition is an extension of the Fourth Edition of the BI-RADS® Atlas and is the culmination of years of collaborative efforts between the subsection heads and their committees, the American College of Radiology, and, importantly, input from users of these lexicons. It is designed for everyday practice and should make it possible to issue unambiguous breast imaging reports and meaningfully evaluate our performance. The Fifth Edition, like its predecessor, includes sections on mammography, ultrasound and magnetic resonance imaging but now includes a new section on follow-up and outcome monitoring.

Because of the extensive updates in the Fifth Edition, the following table has been developed to aid those familiar with the Fourth Edition by organizing and summarizing the major revisions in a side-by-side comparison. The most significant changes are presented below; however, minor changes have been omitted. Note that findings from the lexicon sections are presented as: *Finding/Sub-finding/Descriptor*. To purchase your new Fifth Edition BI-RADS® Atlas, visit [acr.org/birads](http://acr.org/birads).
