Advanced Level Biology Curriculum Principal Subject:

Aufgabenkultur in zentralen Abschlussprüfungen Mirko Krüger, 2015 Prüfungsaufgaben und die ihnen zugrunde liegenden administrativen Vorgaben sind wesentliche Elemente zentraler Abschlussprüfungen. Diese formulieren Leistungserwartungen und sollen bei der Vergabe von Bildungsabschlüssen zur Sicherung von Vergleichbarkeit dienen. Darüber hinaus wird beiden Elementen häufig das Potenzial zugeschrieben zur Weiterentwicklung der Aufgabenkultur im Unterricht beitragen zu können. Als Voraussetzung hierfür sollte sich in den Vorgaben und Prüfungsaufgaben ein kompetenzorientiertes Qualitätsverständnis abbilden. Vor diesem Hintergrund werden hier die beiden Kernelemente zentraler Abschlussprüfungen am Beispiel naturwissenschaftlicher Prüfungen in sechs europäischen Teilstaaten analysiert. Dadurch lassen sich allgemeine Trends und Spezifika zur Ausgestaltung und Qualität fachbezogener Aufgabenkulturen sowie zu Steuerungskonfigurationen der Aufgabenentwicklung eruieren und aus steuerungstheoretischer, fachdidaktischer wie auch vergleichender Perspektive diskutieren.

School Subjects and Curriculum Change Ivor F. Goodson, 2013-04-03 The process of curriculum development is highly practical, as Goodson shows in this enlarged anniversary third edition of his seminal work. The position of subjects and their development within the curriculum is illustrated by looking at how school subjects in particular geography and biology gained academic and intellectual respectability within the whole curriculum during the late 1960s and early 1970s. He highlights how subjects owe their

formation and accreditation to competing status and their power to compete in the provision of worthwhile knowledge and considers subjects as continually changing sub groups of information Such subjects from the framework of the society in which individuals live and over which they have influence This volume questions the basis on which subject disciplines are developed and formulates new possibilities for curriculum development and reform in a post modernist age Teaching Chemistry Around the World Björn Risch, 2010 As teachers we often tend to expect other countries to teach chemistry in much the same way as we do but educational systems differ widely At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over the world Teaching Chemistry around the World 25 countries have participated in the project The resulting country studies are presented in this book This book may be seen as a contribution to make the structure of chemistry teaching in numerous countries more transparent and to facilitate communication between these countries Especially in the case of the school subject chemistry which is very unpopular on the one hand and occupies an exceptional position on the other hand due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving we have to learn from each others educational systems
