Obligations: A Pragmatic Framework Dennis R. Cooley,2015-06-22 This book brings together the relevant interdisciplinary and method elements needed to form a conceptual framework that is both pragmatic and rigorous By using the best and often the latest work in thanatology psychology neuroscience sociology physics philosophy and ethics it develops a framework for understanding both what death is which requires a great deal of time spent developing definitions of the various types of identity in the moment and identity over time and the values involved in death This pragmatic framework

answers questions about why death is a form of loss why we experience the emotional reactions feelings and desires that we do which of these reactions feelings and desires are justified and which are not if we can survive death and how whether our deaths can harm us and why and how we should prepare for death Thanks to the pragmatic framework employed the answers to the various questions are more likely to be accurate and acceptable than those with less rigorous scholarly underpinnings or which deal with utopian worlds

World History: Cultures, States, and Societies to 1500 Eugene Berger, George Israel, Charlotte Miller, Brian Parkinson, Andrew Reeves, Nadejda Williams, 2023-11-27 World History Cultures States and Societies to 1500 is an insightful collection that traverses the rich tapestry of human history up to the medieval period Through an array of literary styles the anthology captures the complexity and diversity of ancient and early medieval civilizations The works in this volume offer a profound exploration of global interconnectedness long before the advent of modern globalization Standout pieces provide introspective views into the cultural mores societies and governmental structures of influential civilizations such as the Mesopotamians Egyptians and Mayans while elucidating overarching themes of societal evolution and cross cultural exchanges The anthology's contributors including Eugene Berger George Israel Charlotte Miller Brian Parkinson Andrew Reeves and Nadejda Williams are distinguished historians and scholars whose diverse backgrounds and expertise are woven into the narrative Each author draws upon historical cultural and literary movements that shaped the ages they dissect bringing a multidimensional perspective to this comprehensive compilation The collective contributions underscore the complexities of each culture and state resulting in a harmonized yet multifaceted record of world history that aligns with contemporary scholarly efforts to present a more interconnected view of early human societies This anthology is an indispensable resource for readers eager to dive into the vast expanse of world history and experience the undulating dialogue of civilizations through a single volume It offers a rare opportunity to explore a confluence of perspectives and styles illuminating a unified narrative while celebrating the diversity intrinsic to historical study By engaging with these works readers will enrich their understanding of how disparate societies have shaped and have been shaped by the world we inhabit today

From Atoms to Galaxies Sadri Hassani, 2011-06-13 College students in the United States are becoming increasingly incapable of differentiating between proven facts delivered by scientific inquiry and the speculations of pseudoscience In an effort to help stem this disturbing trend *From Atoms to Galaxies* A Conceptual Physics Approach to Scientific Awareness teaches heightened scientific acuity as it educates students about the physical world and gives them answers to questions large and small Written by Sadri Hassani the author of several mathematical physics textbooks this work covers the essentials of modern physics in a way that is as thorough as it is compelling and accessible Some of you might want to know How did Galileo come to think about the first law of motion Did Newton actually discover gravity by way of an apple and an accident Or maybe you have mulled over Is it possible for Santa Claus to deliver all his toys Is it possible to prove that Elvis does not visit Graceland every midnight Or perhaps you've even wondered If

ancient Taoism really parallels modern physics If psychoanalysis can actually be called a science How it is that some philosophies of science may imply that a 650 year old woman can give birth to a child No Advanced Mathematics Required A primary textbook for undergraduate students not majoring in physics From Atoms to Galaxies examines physical laws and their consequences from a conceptual perspective that requires no advanced mathematics It explains quantum physics relativity nuclear and particle physics gauge theory quantum field theory quarks and leptons and cosmology Encouraging students to subscribe to proven causation rather than dramatic speculation the book Defines the often obscured difference between science and technology discussing how this confusion taints both common culture and academic rigor Explores the various philosophies of science demonstrating how errors in our understanding of scientific principles can adversely impact scientific awareness Exposes how pseudoscience and New Age mysticism advance unproven conjectures as dangerous alternatives to proven science Based on courses taught by the author for over 15 years this textbook has been developed to raise the scientific awareness of the untrained reader who lacks a technical or mathematical background To accomplish this the book lays the foundation of the laws that govern our universe in a nontechnical way emphasizing topics that excite the mind namely those taken from modern physics and exposing the abuses made of them by the New Age gurus and other mystagogues It outlines the methods developed by physicists for the scientific investigation of nature and contrasts them with those developed by the outsiders who claim to be the owners of scientific methodology Each chapter includes essays which use the material developed in that chapter to debunk misconceptions clarify the nature of science and explore the history of physics as it relates to the development of ideas Noting the damage incurred by confusing science and technology the book strives to help the reader to emphatically demarcate the two while clearly demonstrating that science is the only element capable of advancing technology

The Rise of Empires Sangaralingam Ramesh, 2018-11-11 This book describes and evaluates how institutional innovation and technological innovation have impacted on humanity from pre historical times to modern times and how societies have been transformed in history The author interrogates the relationship between innovation and civilisation particularly the dynamic whereby innovation leads to empire building and explores innovation efforts that stimulated economic and social synergies from the Babylonian Empire in 1900 BC up to the British Empire in the twentieth century The author uses historical cross cultural case studies to establish the factors which have given competitive advantages to societies and empires This book will be of interest to researchers and students in political economy economic history economic growth and innovation economics
