Software Engineering Dr. (Prof.) Rajendra Prasad,Prof. Govind Verma,2016-01-01 The importance of Software Engineering is well known in various engineering fields Overwhelming response to my books on various subjects inspired me to write this book The book is structured to cover the key aspects of the subject Software Engineering This book provides logical method of explaining various complicated concepts and stepwise methods to explain the important topics Each chapter is well supported with necessary illustrations practical examples and solved problems All the chapters in the book are arranged in a proper sequence that permits each topic to build upon earlier studies All care has been taken to make students comfortable in understanding the basic concepts of the student Some of the books cover the topics in great depth and detail while others cover only the most important topics Obviously no single book on this subject can meet everyone's needs but many lie to either end of spectrum to be really helpful At the low end there are the superficial ones that leave the readers confused or unsatisfied Those at the high end cover the subject with such thoroughness as to be overwhelming The present edition is primarily intended to serve the need to students preparing for B Tech M Tech and MCA courses This book is an outgrowth of our teaching experience In our academic interaction with teachers and students we found that they face considerable difficulties in using the available books in this growing academic discipline The authors simply presented the subjects matter in their own style and make the subject easier by giving a number of questions and summary given at the end of the chapter

This is an open access book. With the rapid development of society and the continuous progress of computer science and technology, when entering the information age, design has also been integrated into the new media age in time. The application of computer technology in design has broken the limitations of traditional design, achieved a huge breakthrough in the field of design, provided more innovative forms of expression for design, and also achieved subversive changes in design methods. We need to note that design comes from life, and then it is a matter of applying tools and crafting techniques to realize it. For designers, maintaining innovation is still the first and foremost in creation. How to use technology to enable design without relying on technology is still a dilemma. Therefore, it is necessary to create a space for the researchers, practitioners, and enthusiasts in the field of computing and design to gather and discuss this current issue. The International Conference on Computer Technology and Media Convergence Design aims to accommodate this need as well as to 1. Advance the academic field by exploring cutting edge research and applications, 2. Open up new horizons, broaden the horizons of computer technology research and design, 3. Create academic forums to provide opportunities for academic resource sharing and research exchanges. 2022 2nd International Conference on Computer Technology and Media Convergence Design CTMCD 2022 will be held in Dali, China, during May 13-15, 2022. CTMCD 2022 invites the researchers, practitioners, and enthusiasts in the field of computing and design to participate and share knowledge. We also accept papers on computer technology and media convergence design.
