*Human Resources Management In Education* Austin Ezenne, 2012-12-01 This book Human Resources Management in Education: Developing Countries Perspectives contains eleven chapters. Human resources in an educational organisation refer to all the human beings working in that organisation, including teachers, students, administrators, and all other members of staff working in that organisation. The study of human resources management in education will provide you with a theoretical and practical knowledge about the processes of acquiring employees, establishing good relationships with them, training and developing them, retaining and compensating them for their services. These are important because effective school leadership and management have become very crucial in recent times in the management of educational organisations. Numerous problems are facing many school systems in developing countries today, and human financial and material resources are scarce, and therefore strategic management of all resources is crucial for achieving the goals of the educational systems and the school organisations.

Features engaging simulations in the form of case studies and critical questions to help students apply the concepts to practice. Accompanied by High Quality Ancillaries: Instructors Resources on CD-ROM includes a test bank, sample syllabi, PowerPoint slide presentations, and more.
