

Internal Assessment: IB Biology

What in the world is Internal Assessment?

Teacher-based or Internal Assessment (IA) makes up 24% of your mark for IB Biology (what the college receives). Each IB Group 4 Experimental Science student maintains a portfolio ("Practical Scheme of Work" or PSOW in IB lingo). This portfolio contains laboratory work that I have graded (internally assessed) using IB's scoring rubric. The IB Organization (IBO) mandates the number of hours we spend in the laboratory but not the number or topics of Internally Assessed lab reports. IBO does stipulate that, in a two-year Higher Level (HL) course, student work must be judged against three main criteria at least twice. If any of the criteria are assessed more than twice, then the student will be awarded the two highest scores. The three formative Internal Assessment Criteria are:

- Design
- Data Collection and Processing
- Conclusion and Evaluation.

Each of the criteria is subdivided into three aspects. Descriptions are provided on my website to indicate what is needed to meet the requirements of a given aspect completely (2 pts), partially (1 pt), or not at all (0 pts). These judgments are then translated into a score out of a maximum of 6 for each of the three criteria (see example below). Since each criteria is assessed twice, you can earn up to 36 points from your written lab reports.

Example: Lab Report #2

DESIGN			
Level/Marks	Aspect 1 Defining the problem and selecting variables	Aspect 2 Controlling the Variables	Aspect 3 Developing a method for collection of data
Complete/2	Formulates a focused problem/research question and identifies the relevant variables.	Designs a method for the effective control of the variables.	Develops a method that allows for the collection of sufficient relevant data.
Partial/1	Formulates a problem/research question that is incomplete OR identifies only some relevant variables.	Designs a method that makes <u>some</u> attempt to control the variables.	Develops a method that allows for the collection of insufficient relevant data.
Not at all/0	Does not identify a problem/research question AND does not identify any relevant variables	Designs a method that does not control the variables.	Develops a method that does not allow for any relevant data to be collected.

Final Mark out of possible 6 = 4

Example: Lab Report #5

DATA COLLECTION AND PROCESSING (DOP)			
Level/Marks	Aspect 1 Recording raw data	Aspect 2 Processing raw data	Aspect 3 Presenting raw data
Complete/2	Records appropriate quantitative and associated qualitative raw data, including units and uncertainties where relevant.	Processes the quantitative data correctly.	Presents processed data appropriately, and, where relevant, includes error bar and uncertainties.
Partial/1	Records appropriate quantitative and associated qualitative raw data, but with some mistakes or omissions.	Processes quantitative data, but with some mistakes and/or omissions.	Presents processed data appropriately, but with some mistakes and/or omissions.
Not at all/0	Does not record any appropriate quantitative raw data OR raw data is incomprehensible.	No processing of quantitative raw data is carried out OR major mistakes are made in processing.	Presents processed data inappropriately OR incomprehensibly.

Final Mark out of possible 6 = 4
