National Course Classification System for Secondary Education ,1995 **Updraft Downdraft** Marilyn Crawford, Eleanor Dougherty, 2003-06-11 Ever wonder why there is such a big gap in the number of students who succeed in comparison to those who do not The duality of educational experiences that permeate our secondary schools leads to one group of students heading into post secondary education while others either receive terminal degrees or drop out This updraft downdraft phenomena occurs because time talent and monies tend to drift into the updraft group s educational arena leaving the downdraft students and teachers with less time to teach fewer qualified teachers and fewer supporters This book provides a set of tools to assist schools and communities in reallocating their resources more effectively Using school artifacts educators can collect the data and information needed to make better decisions and leverage what they have equitably The process of collecting analyzing and acting on the data described promotes more strategic decision making about school resources Samples of data and analyses around master schedules student schedules curriculum guides and other artifacts inside the school and district are provided Recommended for anyone seeking ways to understand the problems inside the public schools and ways to find solutions UNO.
