representing two thirds of the world trade shows the relevance of this Convention Moreover the International Chamber of Commerce ICC has published a model for an international sales contract that presupposes the application of the Convention Since no supranational court exists to safeguard a uniform interpretation of its provisions the case law from different states on the basis of the CISG needs to be compared One of the main obligations for the seller under the Convention is to deliver goods which are in conformity with the contract art 35 CISG With respect to this particular obligation a number of questions have arisen For example do the goods delivered need to comply with any public law requirements in the country where the goods will be used When and how does a buyer have to give notice to the seller of any lack of conformity Is any fault on the part of the seller required for a buyer to be able to rely on this provision Who bears the burden of proof Can a buyer rely on any concurrent claims based on national law alongside his claim based on lack of conformity This book contains an analysis of the case law that has been established on the basis of the CISG concerning the aforementioned questions Special attention has been paid to court decisions in Austria Belgium France Germany the Netherlands and Switzerland as well as to arbitral awards by the ICC Court of Arbitration In this respect the role of the UNIDROIT Principles of International Commercial Contracts in the interpretation of the CISG has also been analysed The book provides a unique combination because it contains both an analysis of the issue of non conformity as such and an overview of the recent case law on this topic as well as recommendations for international commercial practice Therefore this book will be of interest to both academics and legal practitioners

**The Harmonisation of the International Sale of Goods through Principles of Law and Uniform Rules** Jorge Balmaceda, 2020-04-02 This book describes how the international sales of goods have generally been ruled by either English Law or Civil Law which has often posed problems due to different approaches regarding certain principles and institutions It clarifies how the Vienna Convention on Contracts for the International Sale of Goods of 11th April 1980 tried to harmonise these differences with a codification technique typical of civil law giving privilege to rules of civil law most of the time but also introducing institutions from common law that are not incompatible with civil law It explains why the general principles of civil law and of UNIDROIT help with this goal of harmonisation integrating the loopholes of the UN Convention on Contracts for the International Sale of Goods CISG during its interpretation The work demonstrates why codification prevails over common law in the CISG most of the time giving certitude and sophistication to this matter which is vital for global commerce [Dalhuisen on Transnational Comparative, Commercial, Financial and Trade Law Volume 2](#) Jan H Dalhuisen, 2013-06-27 This is the fifth edition of the leading work on transnational and comparative commercial and financial law covering a wide range of complex topics in the modern law of international commerce finance and trade As a guide for students and practitioners it has proven to be unrivalled Since the fourth edition the work is now divided into three volumes each of which can be used independently or as part of the complete work Volume one covers the roots and foundations of private law the different orientations and structure of civil and common law the concept forces and theoretical basis of the transnationalisation of the law in the professional sphere the autonomous sources of the new law merchant or modern *lex mercatoria* its largely finance driven impulses and its relationship to domestic public policy and public order requirements Volume two deals with transnational contract movable and intangible property law Volume three deals with financial products and financial services with the structure and operation of modern commercial and investment banks and with financial risk stability and regulation including the fall out
