Shahan, 2023-07-26 The economic and social development that Bangladesh has achieved in the past two decades has made Bangladesh a development paradox This book tries to explain this paradox through a political economy lens The book explains the linkages between the state changing society and emerging private sector and examines whether the social transformation taking place in Bangladesh has the potential to live up to the expectations of a middle income country The early part of the book unravels the myriad relations between the state society and market to project the aspirations of a newly independent nation It analyzes how political turmoil militarization of politics politicization of institutions reforms initiatives industrial and social development policies and the power nexus influenced the nature of the political economy of Bangladesh The book goes on to examine how domestic appetite for capital and raw materials the digital revolution and the capacity of the local market to absorb expanded economic activities have created an environment that catalyzes innovation and entrepreneurship The book also explains how the country has attempted to transform from an agrarian to a manufacturing based economy with rapid growth in the ready made garment industry pisciculture pharmaceuticals and the ICT sector Bangladesh s journey from an emerging economy towards a developed country would interest those researching on development economics and those in policy making History and Financial Crisis Christopher Kobrak, Mira Wilkins, 2014-06-11 One striking weaknesses of our financial architecture which helped bring on and perhaps deepen the Panic of 2008 is an inadequate appreciation of the past Information about how the system functioned and the reliability of organizations and institutional controls were drawn from a relatively narrow group of recent examples History and Financial Crisis Lessons from the 20th Century is an attempt to broaden the range of historical sources used by policy makers to understand and treat financial crises Many recent discussions of the 2008 panic and the economic turmoil have found the situation to either be unprecedented or greatly similar to that of 1931 However the book s wide range of contributors suggest that the economic crisis of 2008 cannot be categorised in this way This book was originally published as a special issue of Business History Intelligible Design Julio Antonio Gonzalo, Manuel M. Tan Kah kee 1874-1961 For a Chinese immigrant in South East Asia to make good is not unique but what is unique in Tan Kah kee's case is his enormous contribution to employment and economic development in Singapore and Malaya. He was the only Chinese in history to have single handedly founded a private university in Amoy and financially maintained it for sixteen years. He was the only Hua chiao of his generation to have led the Chinese in South East Asia to help China to resist the Japanese invasion in a concerted and coordinated manner. Moreover he was the only Hua chiao leader to have played both Singapore and China politics and affairs in close quarters rubbing shoulders with British governors, Chinese officials and commanders. Finally it is important to point out that Tan Kah kee was the only Hua chiao in his times to have combined his Pang community and political power and influences for the advancement of community, regional and national goals. This is an in depth study of not just Tan Kah kee per se but also the making of a legend through his deeds, self sacrifices, fortitude and foresight. This revised edition sheds new light on his political agonies in Mao's China over campaigns against capitalists and intellectuals. Moreover it analyses more comprehensively the varied legacies of Tan Kah kee including his successors, the style of his non partisan political leadership, his educational strategy for nation building, social change and OC the Spirit of Tan Kah kee. Currently in vogue in his home province Fukien.

Rockefeller and the Internationalization of Mathematics Between the Two World Wars Reinhard Siegmund-Schultze, 2012-12-06 Philanthropies funded by the Rockefeller family have been prominent in the social history of the twentieth century for their involvement in medicine and applied science. This book provides the first detailed study of their relatively brief but nonetheless influential foray into the field of mathematics. The careers of a generation of pathbreakers in modern mathematics such as S. Banach, B. L. van der Waerden and Andr. Weil were decisively affected by their

becoming fellows of the Rockefeller funded International Education Board in the 1920s To help promote cooperation between physics and mathematics Rockefeller funds supported the erection of the new Mathematical Institute in G ttingen between 1926 and 1929 while the rise of probability and mathematical statistics owes much to the creation of the Institut Henri Poincar in Paris by American philanthropy at about the same time This account draws upon the documented evaluation processes behind these personal and institutional involvements of philanthropies It not only sheds light on important events in the history of mathematics and physics of the 20th century but also analyzes the comparative developments of mathematics in Europe and the United States Several of the documents are given in their entirety as significant witnesses to the gradual shift of the centre of world mathematics to the USA This shift was strengthened by the Nazi purge of German and European mathematics after 1933 to which the Rockefeller Foundation reacted with emergency programs that subsequently contributed to the American war effort The general historical and political background of the events discussed in this book is the mixture of competition and cooperation between the various European countries and the USA after World War I and the consequences of the Nazi dictatorship after 1933 Ideological positions of both the philanthropists and mathematicians mattered heavily in that process Cultural bias in the selection of fellowsand of disciplines supported and the economic predominance of American philanthropy led among other things to a restriction of the programs to Europe and America to an uneven consideration of European candidates and to preferences for Americans Political self isolation of the Soviet Union contributed to an increasing alienation of that important mathematical culture from Western mathematics By focussing on a number of national cultures the investigation aims to represent a step toward a true inter cultural comparison in mathematics
