

Problem in Current System:

The Bank Management System is an application for maintaining a person's account in a bank. The system provides the access to the customer to create an account, deposit/withdraw the cash from his account, also to convert currency. The following documentation provides the specification of the system.

We are mainly concerned with developing a banking system where a Customer can submit his/her deposit amount to bank if he/she has an account or can create a new account in this bank. Customer can also view the status and change currency of his/her bank account, can view account balance. One can easily maintain the above things if he/she has an account by login through his unique account number.

Proposed System:

The application will be extremely beneficial for the Customers intending to use and operate their bank account and will get various benefits in the field of management of accounts on a clean and user-friendly platform.

"Bank Account System", is a simple application, which is especially generated and designed for the bank in order to enter the applicant information about his or her bank account and can perform other function like currency change. It is user name and ID protected as well.

Following are the major objectives behind the new proposed system:

- It creates a user friendly environment, where a normal user can access through all the benefits of the system.
- It provides security from unauthorized access, only admin or authorized users are access granted to the system.
- It increases efficiency and saves the time.
- No any danger and obstacles from external entities.
- Easy access of saved data inside the system.
- Complex Banking operations and Transaction operations are efficiently handled by the application
- It has ease of use along with complete reference
- It is highly secured and less time consuming; hence time wastage can be avoided
- Up to date records of the customers are maintained by the authority.

Benefits of Proposed System:

The aim of Bank Manager System (BMS) is to automate all the activities of the Bank Transaction to increase the performance. This will be the desktop application that will be used to maintain the following:

- User friendly GUI.
- Fully Efficient
- Easy to handle customer account
- Improved services
- Provides better account management facilities
