Smith, Andrew H. Kaye, Christopher Christophi, Wendy A. Brown, 2020-01-06 Textbook of Surgery is a core book for medical and surgical students providing a comprehensive overview of general and speciality surgery Each topic is written by an expert in the field The book focuses on the principles and techniques of surgical management of common diseases Great emphasis is placed on problem solving to guide students and junior doctors through their surgical training Human and Machine Hearing Richard F. Lyon, 2017-05-02 Human and Machine Hearing is the first book to comprehensively describe how human hearing works and how to build machines to analyze sounds in the same way that people do Drawing on over thirty five years of experience in analyzing hearing and building systems Richard F Lyon explains how we can now build machines with close to human abilities in speech music and other sound understanding domains He explains human hearing in terms of engineering concepts and describes how to incorporate those concepts into machines for a wide range of modern

applications The details of this approach are presented at an accessible level to bring a diverse range of readers from neuroscience to engineering to a common technical understanding The description of hearing as signal processing algorithms is supported by corresponding open source code for which the book serves as motivating documentation
