Substance Abuse in Adolescents and Young Adults Donald E. Greydanus, Gabriel Kaplan, Dilip R. Patel, Joav

Merrick,2013-10-14 The abuse of drugs and chemicals has become a problematic public health dilemma for the world's population and one that must be dealt with by parents, societies, clinicians, researchers, and even countries in the world. This book discusses the complex neurobiology that underlies drug addiction and reveals how these illicit chemicals disrupt central nervous system neurotransmission involving such neurotransmitters as serotonin, dopamine, and others. This manual reviews current understanding in drug interactions with neurotransmitter systems, neuroimmune signaling, current research on reward circuitry, and current medications used to treat drug addiction. It also discusses related topics such as drug addiction in females, co-morbid conditions, drug addiction in minority populations, prenatal drug exposure, and others. The book covers new drugs of the 21st century and discusses such controversial topics as legalization of drug use. It also provides internet resources, treatment facilities by state, and parent support organizations. The importance of prevention of drug abuse is a key theme of the book.

Adolescence Mental Health in School and University Iman Permana, Herni Susanti,2024-07-29 A school, whether run by the government or a private institution, is established to prepare adolescents for adulthood. In some regions, some religious societies have established a comprehensive educational institution supported by their religious competencies requirement in their curriculum along with the national curriculum. Adolescence is a period of life that ranges from 10 to 19 years old and expands from school to the early phase of university. Adolescents are considered highly susceptible to mental health issues. Anxiety, depression, behavioral disorders, and suicidal attempts have been shown to increase before the age of 24. There is a myriad of factors that can contribute to the development of mental health disorders in this context, including family parenting style and bullying from peers and teachers. Failing to address contributing factors may hinder adolescents from fulfilling and sustaining healthy and productive adult lives.

The Handbook of Adult Clinical Psychology Alan Carr, Muireann McNulty,2016-03-31 The second edition of the Handbook of Adult Clinical Psychology: An Evidence-Based Practice Approach, like its predecessor, provides clinical psychologists in training with a comprehensive practice handbook to help build the skills necessary to complete a clinical placement in the field of adult mental health. While practical in orientation, the book is based solidly on empirical evidence. Building on the success of the previous edition, this handbook has been extensively revised in a number of ways. Throughout the book, the text, references, and website addresses have been updated to reflect important developments since the publication of the first edition. Recent research findings on the epidemiology, aetiology, course, outcome, assessment, and treatment of all psychological problems considered in this volume have been incorporated into the text. Account has been taken of changes in the diagnosis and classification of psychological problems reflected in the DSM-5. Chapters on ADHD in adults, emotion-focused therapy, radical open dialectical behaviour therapy, and schema therapy have been added. The book is divided into 6 sections. Section 1 covers conceptual frameworks for practice, lifespan development, classification, and epidemiology. CBT, psychodynamic, emotion-focused, systemic, and bio-medical models, and general assessment procedures. Section 2 deals with mood problems, depression,

bipolar disorder suicide risk and anger management Section 3 focuses on anxiety problems social phobia generalized anxiety disorder panic disorder obsessive compulsive disorder post traumatic stress disorder and depersonalization disorder Section 4 deals with psychological problems linked to physical health health anxiety somatization chronic pain adjustment to cancer and eating disorders Section 5 focuses on other significant psychological problems that come to the attention of clinical psychologist in adult mental health services ADHD in adults alcohol and other drug problems psychosis and psychological problems in older adults Section 6 contains chapters on therapeutic approaches to psychological distress related to complex childhood trauma dialectical behaviour therapy for borderline personality disorder racially open dialectical behaviour for over controlled presentations and schema therapy Each of the chapters on clinical problems explains how to assess and treat the condition in an evidence based way with reference to case material Interventions from cognitive behavioural psychodynamic interpersonal systemic and biomedical approaches are described where there is evidence that they are effective for the problem in question Skill building exercises and further reading for psychologists and patients are included at the end of each chapter This book is one of a set of three volumes which cover the lion s share of the curriculum for clinical psychologists in training in the UK and Ireland The other two volumes are the Handbook of Child and Adolescent Clinical Psychology Third Edition by Alan Carr and the Handbook of Intellectual Disability and Clinical Psychology Practice Second Edition edited by Alan Carr Christine Linehan Gary O Reilly Patricia Noonan Walsh John McEvoy

Guide to Psychological Assessment with African Americans Lorraine T. Benuto, Brian D. Leany, 2014-11-20 The movements toward cultural sensitivity and evidence based practice are watershed developments in clinical psychology As a population with a long history of substandard treatment from mental health systems African Americans have especially benefitted from these improvements But as with other racial and ethnic minorities finding relevant test measures in most psychological domains presents clinicians with an ongoing challenge The Guide to Psychological Assessment with African Americans aims to close the evaluation therapy gap by giving practitioners the tools to choose appropriate instruments while respecting client individuality Expert contributors analyze scarce and far flung data identify strengths and limitations of measures and norms in their use with African American clients and advise on avoiding biases in interpreting results The editors advocate for a theory based hypothesis testing approach to assessment when empirical evidence is lacking and offer guidelines for decision making that is effective as well as ethnically aware The Guide s findings insights and practical information cover the gamut of test and diagnostic areas including IQ and personality Generalized anxiety disorder panic and phobias Neuropsychological assessment cognitive decline and dementia Mood disorders and suicidality Forensic assessment risk and recidivism Measures specific to children and adolescents Plus PTSD substance disorders eating pathology and more Expertly complementing cross cultural treatment texts the Guide to Psychological Assessment with African Americans stands out as a trustworthy resource for treatment planning useful to clinical psychologists neuropsychologists and clinical social workers
