Acronyms and Abbreviations of Computer Technology and Telecommunications Tavaglione, 1992-10-30 Catalogues approximately 7000 acronyms and abbreviations used in computer technology telecommunications and related fields The entries are organized in tabular form to enable readers to locate any specific acronym easily

Dictionary of Communications Technology Gilbert Held, 1995 This comprehensive reference compiles all of the terms definitions and abbreviations associated with data and computer communications a field noted for the fast pace of new developments and advances Over 12 000 entries comprise this definitive resource in the field

Elsevier's Dictionary of Cybernisms T.R. Pyper, C.A.C. Stout, 2000-05-03 This dictionary was produced in response to the rapidly increasing amount of quasi industrial jargon in the field of information technology compounded by the fact that these somewhat esoteric terms are often further reduced to acronyms and abbreviations that are seldom explained Even when they are defined individual interpretations continue to diverge Until now the codes have been reproduced in separate language publications there is no universal listing in alphabetical order that covers the English French Spanish and German languages This dictionary sets out the English French Spanish and German alternatives as a single merge sorted whole Today most of the codes have passed into the public domain simply because they exist in most of the telecommunications systems installed throughout the developed and developing world and are largely known to most of those who work in that particular area However foreign variants often defy even the most astute observer This dictionary seeks to clarify this bewildering situation as much as possible The 26 000 definitions set out here drawn from some 16 000 individual cybernisms cover computing electronics telecommunications including intelligent networks and mobile telephony together with satellite technology and Internet Web terminology Annex I lists some of the innumerable file types found in the filing systems of computers using powerful desktop managers and Annex II lists the abbreviations of country names found in universal resource locators URL

Elsevier's Dictionary of Cybernisms is a useful tool for translators, students, universities, and computer enthusiasts.

Information Technology Encyclopedia and Acronyms Ejub Kajan, 2002-06-14 Since the early days of information technology, professionals have developed an extraordinary huge amount of jargon full of acronyms. This dictionary resolves more than 4,000 broadly used acronyms. It provides concise information, illustrated explanations, and numerous cross references for the majority of technical terms. Most entries for acronyms that are associated with organizations, corporations, and conferences include Web links. All in all, the book constitutes an encyclopaedic documentation of information and communication technology organized by acronyms. An invaluable reference work for anybody who wants to stay on top of today's fast-growing language of information technology.

common acronyms and terminology used in everyday computing Dictionary of Acronyms and Technical Abbreviations Jakob Vlietstra, 2012-12-06 My first encounter with acronyms took place when I was ten years old and growing up in an occupied country during the Second World War. My father proudly announced one day that despite the ban imposed by the occupying administration he had managed to get a radio installed and could receive the BBC. All acronyms used in this introduction are listed in this dictionary. To me the meaning of BBC was that we would receive different information about the war than we got from the usual censored broadcasts. There was of course the well known acronym associated with the NT but at that time I did not realize that it meant more than the postal service. In those years a deteriorated service. Gradually the daily use of acronyms grew. Most of the newly acquired three and four letter abbreviations referred to organizations such as the broadcasting corporations in The Netherlands and Belgium and references to countries such as the USA, USSR and UK. When attending high school the HBS after the war my knowledge of acronyms grew slowly. Even during the ten years I spent in the Dutch Merchant Marine the GHV the number of acronyms was limited to advanced equipment that eventually became known as RADAR, LORAN and DECCA Dictionary of Internetworking Terms and Acronyms Cisco Systems Inc, 2001-02-12 Dictionary of Internetworking Terms and Acronyms is a comprehensive reference to thousands of technical terms that networking students and professionals refer to on a daily basis.
