

choose to type their own résumé for each job application. This approach sends a message to the recruiter that the student is taking special pains for this job—no mass-produced résumé here.

Interview Success

By preparing their own résumés, students develop strong product knowledge and strengthen their personal confidence. Their positive attitudes about the product will make for more successful interviews. Ley and Sandler found that "students' success in the initial career placement hinged significantly on their capacity to present themselves in a winning manner—lucidly outlining their career objectives and their plans for pursuing those objectives and why a position with a particular company appealed to them, all within a 15- to 20-minute interview."⁴

Career success. Most students want a successful career, but the definition of success is different for each individual. That is why each student must have a clear conception, reflected on the résumé, of what constitutes career success. A résumé that makes a clear career statement will help the student find the proper entry-level position with the right hospitality firm. If educators encourage students to use a product-marketing approach to résumé writing, most students can begin to experience career success in their first jobs. □

Designing Research for Publication

One of the chief barriers to the publication of empirical research findings is poor research design. Here are some of the common pitfalls of research studies, and how to avoid them

by Robert C. Lewis
and Abraham Pizam

THE NEED for empirical research for the hospitality industry has probably never been greater than it is today. Empirical research—pragmatic studies with managerial applications—is often performed on a proprietary basis for individual hospitality companies. But what is needed are good *nonproprietary* research studies that will benefit the entire industry.

We contend that hospitality educators should take up this gauntlet—to design and publish useful research that demonstrates what can be done, why it is worthwhile, and how it can be applied. Academic has the tools and knowledge to do this.

But the research must be accurate, reliable, and valid; its findings must be generalizable to situations other than the one being studied; and the research must be reported clearly. The world is full of descriptive studies drawn from biased samples, and studies that leave readers saying, "So what?" When reporting on a study, a researcher must not only develop sound findings but also demonstrate what these findings mean to the industry.

In this article, we discuss how to design a research study that produces results worth publishing. Most manuscripts based on poorly conducted studies are rejected, and reviewers and editors know full well how heartbreaking that rejection must be to the author. *If only this or that had been done.* But one cannot go back and make changes in such things as samples, questionnaires, or measuring scales after the data have been collected. The major requirement for a proper research study is a basic knowledge of research design.

Rejection Slips

Although editors cringe at poorly written manuscripts, writing quality is usually not the chief reason

Perfect for postgraduate students planning their own research in education, this book will help you to understand the philosophical foundations of your work. Conceptualise and refine your research question. Pick the right methodology for your research. Embed ethical considerations throughout your research. This book is an ideal companion for any postgraduate student or early career academic conducting research across education and educational studies.

Design Research Now Ralf Michel, 2012-12-21 Design is becoming a recognised academic discipline and design research is the driving force behind this transformation. *Design Research Now: Essays and Selected Projects* charts the field of design research with introductory essays and selected research projects. The authors of the essays, all leading international design scholars, stake out positions on the most important issues of design research. They locate the significance of design research at the interface with technological development, describe what makes it a necessary ingredient of the continued development of the design disciplines and assign it a seminal role in the relevant developments of society. The essays are supplemented by the presentation of recently completed research projects from universities in the Netherlands, the UK and Italy.

Methoden der Unternehmensentwicklung Daniel Hohmann, 2012-09-13 Das Board of Directors findet in Publikationen der Corporate Governance Forschung stark wachsende Aufmerksamkeit. Allerdings ist weitgehend unbekannt, wie das Board konkret in Strategie eingebunden ist, insbesondere welche Prozesse damit verbunden sind, wie die Arbeitsteilung mit dem Management funktioniert und welche Einflüsse auf die Boardeinbindung wirken. Daniel Hohmann entwickelt eine Konzeption, welche aus einem Governance Strategieprozess der Boardeinbindung bzw. Arbeitsteilung mit dem Management sowie den Einflussfaktoren darauf besteht. Diese Konzeption untersucht er anhand von vier Fallstudien bei Schweizer Großunternehmen.
