Department of the Air Force,1973   *Impact of Migration on Income Levels in Advanced Economies* Ms.Florence Jaumotte,Ksenia Koloskova,Ms.Sweta Chaman Saxena,2016-10-24 The recent refugee surge has brought attention to the macro critical policy issue of migration including speculations that migration can be an unfavorable phenomenon for the receiving economies A careful examination of the impact of migration on host economies is thus critical Focusing on the economic impact most of the academic discussion has centered on the effect of migration on labor markets and public finances Much less is known about the long term impact of immigration on the GDP per capita or the standard of living of host economies This note makes three contributions to estimating this impact it uses a restricted sample of advanced economies rather than a mixed sample of higher and lower income host countries it examines whether the GDP per capita impact varies for different skill levels of migrants and it goes beyond the aggregate impact of migration on GDP per capita to examine how broadly gains in this regard are shared across the population In particular it examines whether migration impacts the income levels of those both at the top and at the bottom of the earnings distribution or whether gains are instead concentrated in a small group of high earners It finds that immigration significantly increases GDP per capita in advanced economies that both high and lower skilled migrants can raise labor productivity and that an increase in the migrant share benefits the average income per capita of both the bottom 90 percent and the top 10 percent of earners suggesting the gains from immigration are broadly shared   *Operations research* Dr. R.K. Gupta,1992   **Advances and Applications in SmartRail, Traffic, and Transportation Engineering** Limin Jia,Yanhui Wang,Said Easa,2025-08-19 This book is a collection of the original peer reviewed conference papers presented at the 2024 2nd International Conference on SmartRail Traffic and Transportation Engineering organized by Chongqing Jiaotong University and Southwest Jiaotong University The conference will be held on 25 27 October 2024 in Chongqing China It covers topics including SmartRail systems autonomous vehicles energy efficiency sustainable transportation big data in transportation and machine learning Speakers discussed innovative technologies and strategies to improve the efficiency reliability and safety of rail networks while exploring the opportunities and challenges of integrating autonomous vehicles into existing transportation networks It provides valuable insights into the latest developments and trends in transportation engineering and technology with a focus on electrification and sustainable transportation It serves as a valuable resource for professionals researchers and students working in the field   Combinatorial Optimization Under Uncertainty Ritu Arora,Shalini Arora,Anand Kulkarni,Patrick Siarry,2023-05-12 This book discusses the basic ideas underlying principles mathematical formulations analysis and

applications of the different combinatorial problems under uncertainty and attempts to provide solutions for the same Uncertainty influences the behaviour of the market to a great extent Global pandemics and calamities are other factors which affect and augment unpredictability in the market The intent of this book is to develop mathematical structures for different aspects of allocation problems depicting real life scenarios The novel methods which are incorporated in practical scenarios under uncertain circumstances include the STAR heuristic approach Matrix geometric method Ranking function and Pythagorean fuzzy numbers to name a few Distinct problems which are considered in this book under uncertainty include scheduling cyclic bottleneck assignment problem bilevel transportation problem multi index transportation problem retrial queuing uncertain matrix games optimal production evaluation of cotton in different soil and water conditions the healthcare sector intuitionistic fuzzy quadratic programming problem and multi objective optimization problem This book may serve as a valuable reference for researchers working in the domain of optimization for solving combinatorial problems under uncertainty The contributions of this book may further help to explore new avenues leading toward multidisciplinary research discussions **Verification, Model Checking, and Abstract Interpretation** Viktor Kuncak,Andrey Rybalchenko,2012-01-12 This book constitutes the refereed proceedings of the 13th International Conference on Verification Model Checking and Abstract Interpretation VMCAI 2012 held in Philadelphia PA USA in January 2012 co located with the Symposium on Principles of Programming Languages POPL 2012 The 26 revised full papers presented were carefully reviewed and selected from 70 submissions The papers cover a wide range of topics including program verification model checking abstract interpretation static analysis deductive methods program certification debugging techniques abstract domains type systems and optimization
