directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc
