Intelligence will soon surpass most human competencies and as a result drastically transform technology's role in our day to day world. The solution for organizational leaders is not to become more like computers. In order for our organizations to survive as we stand at the threshold of a new era, we must tap into the qualities that make us uniquely human. In the face of increasingly intelligent technology, old models of leadership are becoming obsolete. In *The Threshold: Leading in the Age of AI*, accomplished leadership consultant Nick Chatrath interweaves an analysis of antiquated leadership models, the ones that leave AI Era organizations exposed and ineffective, with colleagues frustrated, unmotivated, and burnt out, with his newly developed strategies for more effective threshold leadership methods. Supported with anecdotes, research, and a practical toolkit, *The Threshold* demonstrates that adaptive, effective organizations can be built with human emotional intelligence, cultivating stillness, nurturing independent thinking, finding rhythms of rest and performance, and raising leadership consciousness. With a basis in the ideas and practices that have shaped our organizations in the past, *The Threshold* illuminates how accessing advanced stages of human development can be both competitive and harmonious with AI's growing insinuation into our working world.
