Hidden Fields Charles Ford, 2009-02 In *Hidden Fields* choices are further examined with respect to various themes Charles Ford introduces another concept about choices there are internal choices and external ones Now in the general sense choices are seen as external state of affairs and are associated with our bodies such as an individual act or behavior so one sees the manifested action The internal choices stem from our various selves choices that are made by our souls and spirits and our feeling and reasoning respectively The individual has to think or feel before he/she acts Charles believes ultimately both internal and external choices need to be in harmony with each other so better choices can be seen in an individual life Charles continues to write and strives for excellence in all his poems He invites the readers into his presence to share and exchange of thoughts and views about life experiences All readers can be at home with him from simple to complex truths and philosophies about life Charles wants the readers to discover something about their selves as they read his poems for as human beings we are more similar than difference in our choices It does not matter what race culture or sex differences we have We are still human being for we all think sleep and dream And can truly make better choices Charles hopes all readers can clearly see this in his poems **The sources of values** Antoine Archange Raphael, 2015-05 Certainly

The Horse in Early Modern English Culture Kevin De Ornellas,2013-11-18 Kevin De Ornellas argues that in Renaissance England the relationship between horse and rider works as an unambiguous symbol of domination by the strong over the weak There was little sentimental concern for animal welfare leading to the routine abuse of the material animal This unproblematic practical exploitation of the horse led to the currency of the horse rider relationship as a trope or symbol of exploitation in the literature of the period Engaging with fiction plays poems and non fictional prose works of late Tudor and early Stuart England De Ornellas demonstrates that the horse a bridled unwilling slave becomes a yardstick against which the oppression of England s poor women increasingly uninfluential clergyman and deluded gamblers is measured The status of the bitted harnessed horse was a low one in early modern England to be compared to such a beast is a demonstration of inferiority and subjugation To think anything else is to be na ve about the realities of horse management in the period and is to be na ve about the realities of the exploitation of horses and other mammals in the present day world

Crimes of the Future Jean-Michel Rabaté,2014-04-24 The decade since the publication of Jean Michel Rabat s controversial manifesto The Future of Theory saw important changes in the field The demise of most of the visible French or German philosophers who had produced texts that would trigger new debates then to be processed by Theory has led to drastic revisions and starker assessments Globalization has been the most obvious factor to modify the selection of texts studied During the twentieth century Theory incorporated poetics rhetorics aesthetics

and linguistics while also opening itself to continental philosophy What has changed today The knowledge that we live in a de centered world has destabilized the primacy granted to a purely Western canon Moreover much of contemporary theory remains highly allusive and this is often baffling for students Theory keeps recycling itself producing authentic returns of basic theses terms and concepts Canonical modern theorists often return to classical texts as those of Plato Kant Hegel Nietzsche And now we want to know what is new Crimes of the Future explores the past present and potential future of Theory
